BIM Content Development Robert S. Weygant, 2011-03-31 From the cutting edge of technology comes this book on Building Information Modeling BIM the newest technology in the AEC industry that allows the professional to create 3D models of a building that includes much more data than a traditional 2D CAD file Developing BIM Content explains the type of information that can go into a BIM model from a vendor neutral perspective and explores different methods for organizing content For anyone interested in creating feature rich BIM object and models that work on any platform this is a must have reference Getting to Grips with BIM James Harty, Tahar Kouider, Graham Paterson, 2015-12-14 With the UK government's 2016 BIM threshold approaching support for small organisations on interpreting filtering and applying BIM protocols and standards is urgently required Many small UK construction industry supply chain firms are uncertain about what Level 2 BIM involves and are unsure about taking first steps towards having BIM capability As digitisation increasingly impacts on work practices Getting to Grips with BIM offers an insight into an industry in change supplemented by practical guidance on managing the transition towards more widespread and integrated use of digital tools to manage the design BIM Handbook Rafael Sacks, Charles Eastman, Ghang Lee, Paul construction and whole life use of buildings Teicholz, 2018-07-03 Discover BIM A better way to build better buildings Building Information Modeling BIM offers a novel approach to design construction and facility management in which a digital representation of the building product and process is used to facilitate the exchange and interoperability of information in digital format BIM is beginning to change the way buildings look the way they function and the ways in which they are designed and built The BIM Handbook Third Edition provides an in depth understanding of BIM technologies the business and organizational issues associated with its

implementation and the profound advantages that effective use of BIM can provide to all members of a project team Updates to this edition include Information on the ways in which professionals should use BIM to gain maximum value New topics such as collaborative working national and major construction clients BIM standards and guides A discussion on how various professional roles have expanded through the widespread use and the new avenues of BIM practices and services A wealth of new case studies that clearly illustrate exactly how BIM is applied in a wide variety of conditions Painting a colorful and thorough picture of the state of the art in building information modeling the BIM Handbook Third Edition guides readers to successful implementations helping them to avoid needless frustration and costs and take full advantage of this paradigm shifting approach to construct better buildings that consume fewer materials and require less time labor and capital Integrated Building Information Modelling Peng Wu, Haijiang Li , Xiangyu Wang, 2017-07-10 Building resources information modelling BIM is a set of interacting policies processes and technologies that generates a methodology to manage the essential building design and project data in digital format throughout the building s life cycle BIM makes explicit the interdependency that exists between structure architectural layout and mechanical electrical and hydraulic services by technologically coupling project organizations together Integrated Building Information Modelling is a handbook on BIM courses standards and methods used in different regions Including UK Africa and Australia 13 chapters outline essential information about integrated BIM practices such as the BIM in site layout plan BIM in construction product management building life cycle assessment quantity surveying and BIM in hazardous gas monitoring projects while also presenting information about useful BIM tool and case studies The book is a useful handbook for engineering management professionals and trainees involved in BIM practice The importance of the structures of the construction market for the implementation of the BIM method in an international comparison Esra Korff, 2019-07-24 Master's Thesis from the year 2019 in the subject Engineering Civil Engineering Technical University of Braunschweig Institut fr Bauwirtschaft und Baubetrieb language English abstract Why is Germany behind the UK US and Finland in BIM and how can Germany catch up again Over the years of the rise of BIM numerous scientific papers have been written in various countries about structural barriers to BIM Sometimes about structural barriers that exist in certain countries like Becerik Gerber Rice s 2010 The perceived value of building Information Modeling in the U S Building Industry structural barriers that exist in certain areas like Jeong et al s 2015 BIM acceptance model in construction organisations or general investigations in structural barriers to BIM like Azahr et al s 2017 Building Information Modelling BIM uptake Clear benefits understanding its implementation risks and challenges Scientific papers about structural barriers to BIM in Germany are however still rare and mostly in form of statistics such as Braun et al 2015 To conduct a comprehensive search for structural barriers to BIM and corresponding solutions in Germany an individual approach is hence chosen In a broad international literature review potential structural barriers to BIM are identified from different sources such as the ones named above On the basis of such

possible barriers to BIM a comparison of Germany with the BIM leading countries UK US and Finland is conducted This shall reveal what structural barriers are in effect in Germany that are non existent or already overcome in the other countries to derive corresponding suggestions for Germany Where a differentiation between market participants is necessary in this work the focus is put on contractors To conduct this research the course of this work is chosen as the following It starts in the second chapter with a roundup about BIM and its potential to provide a common information base for this work In the third chapter it is then documented how the UK US and Finland are ahead of Germany with regard to BIM As the reasons for these countries advantage are to be found in a comparison with Germany the methodology for such case study analysis is developed in the fourth chapter Following this methodology possible structural barriers to BIM of a countries AEC industry are identified in the fifth chapter In the sixth chapter the UK US and Finland are compared with Germany according to these identified structural barriers to find out where significant differences exist The BIM Manager's Handbook, Part 4 Dominik Holzer, 2015-08-24 ePart 4 Building up a BIM Support Infrastructure Addressing the back of house aspect of BIM Management this ePart outlines how to go about developing a range of in house BIM standards and guidelines It highlights how BIM Managers go about establishing a training programme for staff and the setting up and management of an organisation's BIM content library It covers the support needed to move BIM information into the field and further into facilities and asset management It emphasises the importance of internal messaging and articulating how to nurture a culture of peer to peer support and advancement of skills by individual staff members Looking beyond a single firm s or organisation's requirements the ePart positions BIM support infrastructure in the wider context of key global BIM policies and guidelines Obook ISBN 9781118987896 ePub ISBN 9781118987919 ePDF ISBN 9781118987834 published August 2015
