Air Pollution Engineering Manual - Air Pollution Control District - County of Los Angeles,1967 *Air Pollution Control Engineering* William Licht,1980-01 **Air and Noise Pollution Control** Lawrence K. Wang,Norman C. Pereira,2012-12-06 The past few years have seen the emergence of a growing widespread desire in this country and indeed everywhere that positive actions be taken to restore the quality of our environment and to protect it from the degrading effects of all forms of pollution air noise solid waste and water Since pollution is a direct or indirect consequence of waste if there is no waste there can be no pollution and the seemingly idealistic demand for zero discharge can be construed as a demand for zero waste However as long as there is waste we can only attempt to abate the consequent pollution by converting it to a less noxious form In those instances in which a particular type of pollution has been recognized three major questions usually arise 1 How serious is the pollution 2 Is the technology to abate it available and 3 Do the costs of abatement justify the degree of abatement achieved The principal intention of this series of books is to help the reader to formulate answers to the last two of the above three questions The traditional approach of applying tried and true solutions to specific pollution problems has been a major factor contributing to the success of environmental engineering and in large measure has accounted for the establishing of a methodology of pollution control

[Air, Pollution Engineering Manual](#) Air & Waste Management Association,1992-06-15 Partially underwritten by the Environmental Protection Agency this manual provides industry and government professionals with the guidelines needed to comply with recent air pollution standards and regulations Leading experts in air pollution control describe control equipment used for gases and particulates including operation design principles cost effectiveness and performance record The authors explain the different processes that generate air pollutants as well as the types of emissions covering most of the industries affected by the Clean Air Act
