Sun Towards High Noon

Peter F. Varadi, 2017-03-27 The meteoric expansion of the solar PV industry resulted from an incredible reduction in the prices of PV systems first described in the author's earlier book *Sun above the Horizon*. It began early in the new century and continued in the following decade with an extraordinary upswing. As a result by the end of 2016 the worldwide PV operational power capacity grew to some 300 GW. Most of this increased capacity 250 GW was installed during the years 2010-2016. Suddenly PV started to affect the traditional generation of electricity and helped reduce carbon emissions and other environmental impacts. This book describes how this happened. Three practically unlimited new PV markets: residential, commercial, and utility scale materialized along with the new PV oriented financial systems needed to provide the required gargantuan scale capital. This book also highlights the increasing demand for and the corresponding increased supply of PV cells and modules on four continents and the impact of this PV breakthrough on our lives and future. To present this unparalleled story of societal transformation the author was helped by the contributions of top experts: Wolfgang Palz, Michael Eckhart, Allan Hoffman, Paula Mints, Bill Rever, and John Wohlgemuth. **Gulf Business**, 2008.
