frequently formulated their national consciousness and experience through children's literature both instructing children as future citizens and highlighting how ideas of childhood inform the discourses of nation and citizenship. Because nation and childhood are so intimately connected it is crucial for critics and scholars to shed light on how children's literatures have constructed and represented historically different national experiences. At the same time given the massive political and demographic changes in the world since the nineteenth century and the formation of nation states it is also crucial to evaluate how the national has been challenged by changing national languages through globalization, international commerce and the rise of English. This book discusses how the idea of childhood pervades the rhetoric of nation and citizenship and how children and childhood are represented across the globe through literature and film.
