Beyond Medicine Paul V. Dutton,2021-04-15 In Beyond Medicine Paul V Dutton provides a penetrating historical analysis of why countless studies show that Americans are far less healthy than their European counterparts Dutton argues that Europeans are healthier than Americans because beginning in the late nineteenth century European nations began construction of health systems that focused not only on medical care but the broad social determinants of health where and how we live work play and age European leaders also created social safety nets that became integral to national economic policy In contrast US leaders often viewed investments to improve the social determinants of health and safety net programs as a competing priority to economic growth Beyond Medicine compares the US to three European social democracies France Germany and Sweden in order to explain how in differing ways each protects the health of infants and children working age adults and the elderly Unlike most comparative health system analyses Dutton draws on history to find answers to our most nettlesome health policy questions
