[Researcher](#) Carlo Ghezzi, 2020-06-22 This book explores research from the researchers perspective why to engage in research what methods to follow how to operate in daily life what the responsibilities are how to engage with society and the ethical issues confronting professionals in their day to day research The book systematically discusses what every student should be told when entering academic or industrial research so that they can avoid going through the painful process of learning by personal experience and lots of errors Rather than being technical it is philosophical and sometimes even anecdotal combining factual information and commonly accepted knowledge on research and its methods while at the same time clearly distinguishing between objective and factual concepts and data and subjective considerations The book is about

scientific research in general and as such holds true for any scientific field. However, it is fair to say that the different fields differ in their research cultures and in their ecosystems. The book reflects the author's experience accumulated over almost 50 years of teaching graduate courses and lecturing in doctoral symposia at Politecnico di Milano, University of Zurich, TU Wien, Peking University, and at various conferences, and of academic research in informatics, also known as computer science. This book is mainly intended for students who are considering research as a possible career option, for in-progress researchers who have entered doctoral programs, and for junior postdoctoral researchers. **India Rising** R. Chidambaram, Suresh Gangotra, 2023-07-24 The book looks at the life of one of India's foremost scientists, Dr. R. Chidambaram, who served as principal scientific advisor to the Government of India and as chairman of the Scientific Advisory Committee to the Cabinet (SACC) from November 2001 to March 2018. As one of India's most distinguished experimental physicists, Dr. Chidambaram has made outstanding contributions to many aspects of basic science and nuclear technology. A Padma Vibhushan awardee, he played a leading and integral role in the design and execution of the peaceful Nuclear Explosion experiment at Pokhran in 1974 and led the team of the Department of Atomic Energy (DAE) which designed the nuclear devices and carried out, in cooperation with the Defence Research and Development Organisation (DRDO), the Pokhran tests in May 1998. During his stewardship of the DAE, the nuclear power programme got a big boost and the capacity of the nuclear power plants increased sharply. Reflecting on his interactions with the scientific community and the political leadership, Dr. Chidambaram describes key events in India's journey to self-reliance in nuclear energy. *India Rising* is not only a memoir of one of India's eminent scientists but also a fascinating account of India's ascendance in the world of science and technology.
