Crises and Integration in European Banking Union Christopher Mitchell, 2023-12-06 It is conventional wisdom among scholars policymakers and other observers that crises are one of the primary drivers of European integration However while many crises have indeed spurred deeper integration there

is also no shortage of crises that failed to produce meaningful deepening or even led to disintegration The literature on European integration has to date failed to develop a theory to identify ex ante which crises are most likely to produce integrating reform Crises and Integration in European Banking Union addresses that gap building a theory of how the combination of crisis severity and origin indicates whether a crisis will produce deep reform modest reform or a persistence of the pre crisis status quo Mitchell does so by examining the relative impact of a series of crises on the centralization of European financial regulation in the 21st century including the 2007 09 Banking Crisis 2010 14 Debt Crisis the Brexit shock and the 2020 21 COVID 19 Pandemic It thus also makes an important contribution to the literature on European financial regulation and the steps needed to complete a European banking and capital markets union The volume not only addresses a significant theoretical gap but also provides a foundation for policymaking in response to future crises by building a framework to identify which challenges are most likely to provide an opportunity for deeper integration
