**Teaching and Learning Japanese Martial Arts: Scholarly Perspectives, Vol. 2** Michael DeMarco, 2017-03-21

In contrast to the overabundance of writings about martial arts that are often promotional and misinformative there are rare works by scholars that are praiseworthy for their sincere unbiased approach to writing This is the very definition of scholarly This two volume anthology brings together the best scholarly works published in the Journal of Asian Martial Arts on the topic of teaching and learning Japanese martial arts In this second volume you ll find eight chapters that dive deep into Japanese martial traditions combining aspects of history and culture that explain how teaching methods developed and evolved Chapter one asks What defines and gives meaning to the practice of karate The Dr Wingate looks to the ideology of karate as presented in the writings of founder Ginchin Funakoshi and traditional Japanese martial arts as ways of self cultivation This ideology is often greatly different from the ideology held by modern practitioners This chapter explores the differences Next Dr Donohue comments on the ideological complex surrounding training in the Japanese martial traditions These systems while remaining relatively uniform through time have in fact been subject to considerable philosophical interpretation and emphasis Why many practice martial arts has little to do with the essential nature of these arts Dr Grossman presents a thesis in his chapter that we can arrive at a deeper understanding of any martial arts using aikido as an example if we consider it to be a symbolic form of communication as well as a martial art and utilize the science of semiotics to translate the message encoded in the body language of aikido techniques A photographic technical section illustrates this process The next chapter by Sakuyama Yoshinaga discusses the potential growth for learning in children How can adults provide the best learning environment The author believes that inspiration comes through subtle emotions of the human heart influencing others The theory is found in ancient samurai traditions and applied by the author in teaching Shorinji Kempo Chapter five by Dr Dykhuizen point out how Asian martial arts are being practiced in cultures other than those within which they originated Specific information concerning how practitioners from different cultures understand them becomes increasingly useful to martial artists and martial arts scholars This chapter summarizes findings of an investigation among aikido practitioners The Japanese Imperial family is said to have been given three symbols of authority by the gods a mirror a jewel and a sword Dr Donohue uses this symbolic structure to discuss varying perspectives on the Japanese martial arts Each aid in our understanding and appreciation of the multifaceted dimensions of the martial arts In his chapter Dr Edinborough examines how Japanese martial arts specifically the approach developed by Inaba Minoru can be functionally understood as a form of art Through referring to the aesthetic theories the article examines budo as a means of organizing experience recognizable alongside painting dance theater and literature The final chapter by Marvin Labbate looks close at the training hall Dressed in a uniform students line up in a ready position come to attention sit meditate and bow This ritualized pattern is performed at the beginning during and at the end of each class but what does it mean In this chapter each element of the ritualized

pattern will be discussed to provide a clear understanding of its original intent If you are interested in Japanese martial traditions you will find much in these eight chapters that clarify why the arts are taught according to a longstanding tradition and also why there have been evolutionary changes in the instructional methods There is sound logic for the old traditions as well as for the changes The scholarly research presented in this anthology will improve a teacher s way of instructing and help a student understand what to expect out of his or her studies

**Jujutsu and Judo in the West** Michael DeMarco,2018-04-24 The late 19th century saw a dynamic growth of contacts between Western countries and the Far East Along with the increase in travel came a wave of educational opportunities for Americans and Europeans to gain first hand experience of living in countries such as China India and Japan Likewise adventurous individuals from the Orient made their way to the West Scholars politicians and business people became experts in their adapted culture Some learned the native language and became experts in their second culture often writing and lecturing on a variety of topics including martial traditions By the early 20th century a number of Japanese jujutsu and judo instructors were teaching their exotic arts in Germany Spain the United Kingdom and the United States How were these instructors viewed by those in their host countries What similarities and differences were seen between the Japanese combatives and the local traditions such as Catch as Catch Can Greco Roman and Pancrase wrestling and styles of boxing Chapters in this anthology present an excellent overview of the early days when jujutsu and judo took foothold in the USA and Europe with particular emphasis on England and the influence of The Budokwai in London which as noted on Wikipedia is the oldest Japanese martial arts club in Europe It was founded in 1918 by Gunji Koizumi and initially offered tuition in jujutsu kendo and other Japanese arts It was the first judo club in Europe This anthology offers a historical view of how and why jujutsu and judo became living traditions in the West and developed over the decades There are six technical

chapters by David Finch well known for his knowledge of judo and famed for his professional photography The last chapter is a fitting finale presenting a comprehensive history and technical description of The Budokwai Kime no kata a judo kata created during the earlier period of the institute The fourteen chapters in this anthology most from the Journal of Asian Martial Arts and a few newer writings also discuss many of the leading practitioners of jujutsu judo As these arts adapted and transformed to Western countries the purpose and modes of practice have also changed This is important for all to study since knowledge of the past is vital for how these forms of combat and sport will evolve in the future *Re-theorizing Discipline in Education* Zsuzsa Millei (Ed),Tom G.
