Cheng-Jui Lu,2003-01-01 This new study takes a keen look at the problems facing the international community due to
conflicts arising from applications of varying competition laws by different competition authorities to international airline
alliances As a result of privatisation deregulation liberalisation and globalisation international air carriers form alliances with
one another in order to cope with growing competition in the international air transport market This book clearly provides an
introduction to the background to and origin of airline alliances different models of alliances and the related anti competitive
practices resulting from existing international airline alliances The potential anti competitive practices resulting from these
cross border alliances trigger a great deal of concern from various competition authorities Thus this study goes on to provide
a detailed analysis regarding the relevant EC competition law and US antitrust law and their applications to alliance
activities The comparison of different applications of EC competition law and US antitrust law to international airline
alliances provides leading research results first hand In the conclusion the essential elements regarding establishing a level
playing field in the international air transport market are identified and the author provides possible solutions for the
harmonisation of different applications of competition law to international airline alliances *Modern Packaging*
