Elements of Numerical Mathematical Economics with Excel Giovanni Romeo, 2019-11-28 Elements of Numerical Mathematical Economics with Excel Static and Dynamic Optimization shows readers how to apply static and dynamic optimization theory in an easy and practical manner without requiring the mastery of specific programming languages that are often difficult and expensive to learn Featuring user friendly numerical discrete calculations developed within the Excel worksheets the book includes key examples and economic applications solved step by step and then replicated in Excel After introducing the fundamental tools of mathematical economics the book explores the classical static optimization theory of linear and nonlinear programming applying the core concepts of microeconomics and some portfolio theory. This provides a background for the more challenging worksheet applications of the dynamic optimization theory. The book also covers special complementary topics such as inventory modelling data analysis for business and economics and the essential elements of Monte Carlo analysis Practical and accessible Elements of Numerical Mathematical Economics with Excel Static and Dynamic Optimization increases the computing power of economists worldwide This book is accompanied by a companion website that includes Excel examples presented in the book exercises and other supplementary materials that will further assist in understanding this useful framework Explains how Excel provides a practical numerical approach to optimization theory and analytics Increases access to the economic applications of this universally available relatively simple software program Encourages readers to go to the core of theoretical continuous calculations and learn more about optimization **Problems Book to accompany Mathematics for Economists** Tamara Todorova, 2010-05-10 In highly processes mathematical courses it is a truism that students learn by doing not by reading Tamara Todorova s Problems Book to Accompany Mathematics for Economists provides a life line for students seeking an extra leg up in challenging courses Beginning with college level mathematics this comprehensive workbook presents an extensive number of economics focused problem sets with clear and detailed solutions for each one By keeping the focus on economic applications Todorova provides economics students with the mathematical tools they need for academic success For years Professor Todorova has taught microeconomic courses to economists and non economists introduced students to new institutional economics as a modern trend in economics and taught quantitative methods and their application to economic theory marketing and advertising
