Artificial Intelligence for Strategic Communication Karen E. Sutherland, 2025-02-17 In an era where AI is revolutionising every aspect of communication, this groundbreaking research monograph provides an essential roadmap for navigating the intersection of artificial intelligence and strategic communication. Drawing on extensive primary research including interviews with 41 experts and surveys of 400 professionals across three continents and eight countries, this book provides insights from relevant scholars, communication practitioners, and AI tool developers. This comprehensive guide combines scholarly rigour with practical application, presenting a data-informed Model for Practice that helps to withstand the constant evolution of AI technology. Each chapter delivers research-informed, actionable tools relating to the multifaceted field of strategic communication, including ethical practice, strategy development, content creation, evaluation, and continuous improvement. Bridging the gap between theoretical understanding and practical implementation, *AI for Strategic Communication* is an invaluable resource for strategic communication scholars, students, and practitioners, essential for advancing careers in the age of AI. This work emerged from the need for a comprehensive source combining scholarly, practitioner, and AI developer perspectives on strategic communication from around the globe.

A History of Fake Things on the Internet Walter Scheirer, 2023-12-05 A Next Big Idea Club Must Read for December 2023 As all aspects of our social and informational lives increasingly migrate online, the line between what is real and what is digitally fabricated grows ever thinner, and that fake content has undeniable real-world consequences. *A History of Fake Things on the Internet* takes the long view of how advances in technology brought us to the point where faked texts, images, and video content are nearly indistinguishable from what is authentic or true. Computer scientist Walter J. Scheirer takes a deep dive into the origins of fake news, conspiracy theories, reports of the paranormal, and other deviations from reality that have become part of mainstream culture, from image manipulation in the nineteenth-century darkroom to the literary stylings of large language models like ChatGPT. Scheirer investigates the origins of Internet fakes, from early hoaxes that traversed the globe via Bulletin Board Systems (BBSs), USENET, and a new messaging technology called email, to today's hyperrealistic AI-generated deepfakes. An expert in machine learning and recognition, Scheirer breaks down the technical advances that made new developments in digital deception possible and shares behind-the-scenes details of early Internet-era pranks that have become touchstones of hacker lore. His story introduces us to the visionaries and mischief makers who first deployed digital fakery and continue to influence how digital manipulation works, and doesn't, today. Computer hackers, digital artists, media forensics specialists, and AI researchers. Ultimately, Scheirer argues that problems associated with fake content are not intrinsic properties of the content itself but rather stem from human behavior, demonstrating our capacity for both creativity

and destruction **Artificial Intelligence and Universal Values** Jay Friedenber**g**,2024-07-14 The field of value alignment or more broadly machine ethics is becoming increasingly important as artificial intelligence developments accelerate By alignment we mean giving a generally intelligent software system the capability to act in ways that are beneficial or at least minimally harmful to humans There are a large number of techniques that are being experimented with but this work often fails to specify what values exactly we should be aligning When making a decision an agent is supposed to maximize the expected utility of its value function Classically this has been referred to as happiness but this is just one of many things that people value In order to resolve this issue we need to determine a set of human values that represent humanity s interests Although this problem might seem intractable research shows that people of various cultures and religions actually share more in common than they realize In this book we review world religions moral philosophy and evolutionary psychology to elucidate a common set of shared values We then show how these values can be used to address the alignment problem and conclude with problems and goals for future research The key audience for this book will be researchers in the field of ethics and artificial intelligence who are interested in or working on this problem These people will come from various professions and include philosophers computer programmers and psychologists as the problem itself is multi disciplinary **University of Illinois Film and Video** University of Illinois Film Center,1988 *Popular Photography* ,1992-04 **PC AI.** ,1996 **The Software Encyclopedia** ,1986 *Popular Photography* ,1993-09 [AI Trends](#) ,1988-10 **Scientific and Technical Aerospace Reports** ,1989 *ESD Technology* ,1990 **Proceedings of the Twelfth National Conference on Artificial Intelligence** American Association for Artificial Intelligence,1994 [AI Magazine](#) ,1987 **Popular Science** ,1989 **Science Abstracts** ,1993 [Datapro Directory of Microcomputer Software](#) ,1998 *Discovering Computers 2002* Gary B.
