Social Media Analytics, Strategies and Governance Hamid Jahankhani, Stefan Kendzierskyj, Reza Montasari, Nishan Chelvachandran, 2022-08-18 Social media has spread rapidly on the global stage driving consumers attention and influence both consciously and subconsciously Whilst this type of platform may have been initially designed as a tool for open communication and expression it is also being utilized as a digital tool with widescale use cases The intelligence explosion information overload and disinformation play a significant part regarding individual group and country perceptions The complex nature of this data explosion created an increasing demand and use of artificial intelligence AI and machine learning ML to help provide big insights to big data AI and ML enable the analysis and dissemination of vast amounts of data however the ungoverned pace at which AI and autonomous systems have been deployed has created unforeseen problems Many algorithms and AI systems have been trained on limited or unverified datasets creating inbuilt and unseen biases Where these algorithmic tools have been deployed in high impact systems there are documented occurrences of disastrous decision making and outcomes that have negatively impacted people and communities Little to no work had been conducted in its vulnerability and ability to exploit AI itself So AI and autonomous systems whilst being a force for societal good could have the potential to create and exacerbate societies greatest challenges This is a cohesive volume that addresses challenging problems and presents a range of innovative approaches and discussion **Transmedia Narratives for Cultural Heritage**

Nicole Basaraba, 2022-04-21 Transmedia Narratives for Cultural Heritage focuses on theoretical approaches to the analysis and creative practice of developing non fiction digital transmedia narratives in the rapidly growing cultural heritage sector

This book applies a media focused transdisciplinary approach to understand the conventions of emerging digital narrative genres. Considering digital media's impact on narrative creation and reception, the approach, namely remixed transmedia, can aid practitioners in creating strategic non-fiction narratives for cultural heritage. These creations also need to be evaluated, and a digital media focused ludonarrative toolkit allows for the critical analysis of the composition and public participation in interactive digital narratives. This toolkit is applied and exemplified in genres including virtual museums, serious games, and interactive documentaries. The book also includes a seven-phase theoretical framework that can assist future creators and project managers of non-fiction transmedia, mothership narratives, and a methodology based on big data analysis for how to invent new cultural heritage narratives through bottom-up remixing that allows for public inclusion. Two transnational case studies on the 11 UNESCO World Heritage Australian Convict Sites and the Irish National Famine Way demonstrate the seven-phase framework's applicability. As many scholars across disciplines are increasingly creating digital narratives on historical topics for public consumption in various forms, the theoretical foundations and practical project management framework will be useful for scholars and project teams in the domains of transmedia studies, interactive narratives, cultural heritage, media studies, comparative literature, and journalism.
