accommodate an alternative urban life informed by digital nomads while encouraging placeless people to take an active part in the city's post industrial transitions The thesis demonstrates new spatial forms and typologies across scales that seek to inspire future urban developments in Tallinn and other cities populated with placeless people On the other hand while we witness placelessness through the work from home scenarios under the crisis of COVID 19 this thesis encourages us to look beyond the current state of emergency and reimagine placelessness in a future urban life where we reclaim our access to the public ground and personal mobility
