Emergency Remote Teaching and Beyond Julian Chen, 2022-02-01. This timely volume addresses issues pertaining to language teaching, learning, and research during the pandemic. In times of a global emergency, the aftermath of emergency remote teaching (ERT) cannot be ignored. The question of how language educators and researchers unleash creativity and employ strategies vis-à-vis ERT still remains to be answered. With practitioners in mind, it covers a broad spectrum of educational settings across continents, target languages, and methodologies. Specifically, it reveals viable ways of utilizing digital technologies to bypass social distancing while highlighting the pitfalls and challenges associated with crisis teaching and research. This volume comprises two parts: Teacher Voice, which vicariously transports readers to practitioners' compelling stories of how teacher resilience, identity, and professional development are crystallized in adaptive pedagogy; online teaching practicum, virtual study programs, and communities of practice during ERT. The second part, Researcher Corner, showcases innovative approaches for both novice and seasoned researchers to upskill their toolkits, ranging from case study research and mixed methods designs to auto and virtual ethnography and social media research. The array of food for thought provides a positive outlook and inspires us to rethink our current practices and future directions in the post-COVID world. Regardless

of their backgrounds and experiences readers will be able to relate to this accessible volume that harmonizes research and practice and speaks from the hearts of all the contributors *Smart Homes For Dummies* Danny Briere, Hurley, 2003-01-03
