As Public as Possible David I. Backer, 2025-12-02 A witty and provocative treatise on the financial policies we'll need to make our public schools work for all children From the

anti CRT panic to efforts to divert tax dollars to charter schools the right wing attack on education has cut deep In response millions of Americans have rallied to defend their cherished public schools But this incisive book asks whether choosing between our embattled status quo and the stingy privatized vision of the right is the only path forward In *As Public as Possible* education expert David I Backer argues for going on the offensive by radically expanding the very notion of the public in our public schools Helping us to imagine a more just and equitable future *As Public as Possible* proposes a concrete set of financial policies aimed at providing a high quality and truly public education for all Americans regardless of wealth and race With witty and provocative prose Backer shows how we can decouple school funding from property tax revenue evening out inequalities across districts by distributing resources according to need He argues for direct federal grants instead of the predations of municipal debt markets And he offers eye opening examples spanning the past and present from the former Yugoslavia to contemporary Philadelphia which help us to imagine a radically different way of financing the education of all of our children

Self-Studies of Science Teacher Education Practices Shawn M. Bullock,Tom Russell,2012-03-21 Part of a vital Springer series on self study practices in teaching and teacher education this collection offers a range of contributions to the topic that embody the reflections of science teacher educators who have applied self study methodology to their own professional development The material recognizes the paradox that lies between classroom science and the education of science teachers the disciplines of science are often perceived as a quest for right answers an unintentional by product of the classroom focus on right answers in student assessment in science In contrast the profession of teaching has few right answers and frequently involves the management of conflicting tensions A dilemma thus arises in science teacher education of how to shift perspectives among student teachers from reductionist to more inclusive attitudes that are open to the mercurial realities of teaching The self studies presented here are unique fresh and stimulating They include the input of a

beginning science teacher as well as science teacher educators from a range of backgrounds and varying levels of experience In addition the volume presents a truly international perspective on the issues with authors hailing from five countries Providing analysis at the leading edge of education theory this collection will make fascinating reading for those teaching science as well as those teaching science teachers
