**Perspectives on Social and Business Sustainability** Tay Kay Luan, 2018-10-12 Addressing the sustainability agenda is never easy The early promises of the corporate social responsibility concept and application have raised better awareness and understanding of its concept and application Understandably the experience and outcome are never the same across the business and social community To begin with issues related to corporate social responsibility CSR come in hundreds of shades The understanding of the definition alone depends on whose perspective and in what context At the very least there is now a greater acceptance of the concept but increasingly corporate leaders need no further persuasion that doing good is more than giving a donation The myriad of CSR issues and concerns is therefore worth a relook but from the conceptual perspectives to understanding of the challenges impacts and trends

Perspectives on Social and Business Sustainability first describes the important elements of different aspects of how CSR is being understood applied and reported The book examines how international trends and developments including market and technology disruptions will continue to shape the sustainability landscape The book is relevant for those wanting to take a quick perspective of the

evolving concept of sustainability and is also useful for those who only want to focus on specified area within the context of social and business sustainability

*Teaching Art History with New Technologies* Kelly Donahue-Wallace,Laetitia Amelia La Follette,Andrea Pappas,2008 Digital images Internet resources presentation and social software interactive animation and other new technologies offer a host of new possibilities for art history instruction Teaching Art History with New Technologies Reflections and Case Studies assists faculty in negotiating the digital teaching terrain The text documents the history of computer mediated art history instruction in the last decade and provides an analysis of the increasing number of tools now at the disposal of art historians It presents a series of reflections and case studies by early adopters who have not just replaced older materials with new but

who have advanced the discipline's pedagogy in doing so. The essays illustrate how new technologies are changing the way art history is taught, summarize lessons learned, and identify challenges that remain. Given the transitional state of the field, with faculty ranging from the computer phobic to the computer savvy, these case studies represent a broad spectrum from those that focus on the thoughtful integration of new technologies into traditional teaching to others that look beyond the familiar art history lecture or seminar format. They provide both practical suggestions and theoretical models for historians of art and visual culture interested in what computer-mediated applications have been successful in art history teaching and where such new approaches may be leading us.
