Teaching translation in the age of generative AI : New paradigm, new learning? JC Penet, Joss Moorkens, Masaru Yamada, 2025-11-20. Since the launch of OpenAI's ChatGPT in 2022, generative artificial intelligence (GenAI) has started reshaping what it means to work as a professional translator in an industry that is becoming increasingly automated. This prompts us to interrogate once again the role and agency of human translators in the translation process, or in other words, the intrinsically human value and values they add to it. A natural corollary is that GenAI forces us, translator educators, to re-interrogate what we do in our translation programmes. Whatever we may think or feel about GenAI, we owe it to our students to engage with it in our programmes. However, because GenAI is not just another tool in the translator's toolkit, we must also do so in a way that raises students' awareness of some of the ethical and sustainability issues around it. This is what *Teaching Translation in the Age of Generative AI: New Paradigm, New*

Learning aims to do Articulated around three main parts Part 1 explores the new skills and competences translator educators need to help their students develop in the age of GenAI In Part 2 the focus shifts to the new knowledge such as data literacy and prompting that students in translation programmes need to engage with in the age of GenAI Finally Part 3 puts some flesh on the bones as it reviews some of the new teaching approaches adopted by colleagues since the advent of GenAI It does so by introducing the reader to a series of vignettes taken from a variety of translation related disciplines and contexts Throughout the entire edited volume the ambition is to be as accessible as possible so that this volume can be of help to as many of us in translation education as possible as we all learn to negotiate the uncharted territory of GenAI **New**
