De Gruyter Handbook of Digital Entrepreneurship Wadid Lamine, Sarah Jack, Alain Fayolle, David B. Audretsch, 2024-06-04 Far reaching technological developments are making a deep impact on

societies and economic environments worldwide With the emergence of new digital infrastructures such as artificial intelligence fintech data analytics robotics and nanotech new creative industries still in a state of flux have arisen while others have disappeared at least in their traditional form The intermixing of traditional and new technologies has led to a redrawing of boundaries and an extension of the limits of entrepreneurship out towards industries with hitherto high barriers to entry due to regulatory technological or structural factors These external enablers have led to a democratization of entrepreneurship and a lessening of the obstacles to starting up a company by reducing or eliminating the difficulties inherent in the entrepreneurial phenomenon in its classical configuration such as high resource intensity uncertainty limited time or information asymmetry The De Gruyter Handbook of Digital Entrepreneurship examines the impact of these technological disruptions not only using the existing paradigms but also by re examining our very conception of the entrepreneurial phenomenon in terms of its evolving nature and shifting contours The contributions to this handbook promote the emergence of new theories and conceptions of the entrepreneurial opportunity and process that more fully reflect the realities of the new environment we are living in They will benefit both academics aiming to familiarize themselves with the state of research and theory within topics and subtopics in digital entrepreneurship as well as practicing entrepreneurs and managers aiming to acquaint themselves with leading edge practices and insights in digital entrepreneurship

De Gruyter Handbook of Media Technology and Innovation Richard A. Gershon, 2025-01-27 The De Gruyter Handbook of Media Technology and Innovation brings together scholars from around the world to provide key insights on emerging technology trends and issues related to the fields of media management information technology product design planning and digital lifestyle This handbook is about the power of good ideas It s about those business enterprises government planners educators and entrepreneurs that have harnessed the power of good ideas to become real difference makers in the world we live in Keeping pace with fast paced technology change requires ongoing assessment and reassessment of the media management and technology fields to address important questions and emerging issues A major premise of this book is that given the complex and ever changing state of media technology we have a responsibility and obligation to engage in a broader interdisciplinary dialogue whose purpose is to understand the current and future state of media technology and innovation as well as to appreciate the social impact that such technologies have on business education and the general public Forecasting the future as any weatherperson or stock broker can tell you is a risky business But in this book we use the phrase the creative next step as a way to talk about the future and what we can expect in terms of the opportunities and challenges going forward

The Oxford Handbook of Identities in Organizations Andrew D. Brown, 2020-01-09
Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities
accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research
on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in
organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting
Particular attention has been given to processes of identity construction often styled identity work Research has focused on
how why and when such processes occur and their implications for organizing and individual group and organizational
outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and
psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and
consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether
they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power
combined with other conceptual issues continue to invigorate the field However these debates have also led to some
scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are
considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has
significant potential to generate multiple compelling streams of theorizing in organization and management studies
