How Do I Ai Blog Writer In The United States:

Judges, Technology and Artificial Intelligence Tania Sourdin, 2021-05-28 New and emerging technologies are reshaping justice systems and transforming the role of judges The impacts vary according to how structural reforms take place and how courts adapt case management processes online dispute resolution systems and justice apps Significant shifts are also occurring with the development of more sophisticated forms of Artificial Intelligence that can support judicial work or even replace judges These developments together with shifts towards online court processes are explored in *Judges Technology and Artificial Intelligence* **The Radical Case for Teaching Skim Reading in First-Year Writing** Ellen C.

Carillo, 2025-10-15 The Radical Case for Teaching Skim Reading in First Year Writing encourages faculty particularly in writing studies to check internal biases toward deep reading and teach skim reading in first year writing courses Written by Ellen C Carillo who has previously published on the importance of teaching deep reading this small book is a controversial prompt for further discussion and exploration Data from studies of the lived experiences of undergraduates indicate that students do not need deep reading practices in the majority of their classes across the disciplines and moreover that students succeed in their classes by skim reading Rather than imagining an idealized set of circumstances that allow for sustained deep reading as does a great deal of the scholarship on reading in writing studies The Radical Case for Teaching Skim Reading in First Year Writing argues for teaching students reading practices that will support their success in their college writing assignments rather than those strategies the field believes should support their success In our information landscape and our fragile democracy encouraging skimming as opposed to deep reading may seem like a gamble this very tendency toward the quick rather than the critical has undoubtedly contributed to the current crisis of mass misinformation However teaching students to use skim reading as a strategic tool for purposeful engagement and efficient yet thoughtful information filtering better equips them to navigate the rapidly changing information landscape and manage the fast paced flow of content from diverse media sources *African Artificial Intelligence* Mark Nasila, 2024-05-27 Artificial intelligence AI is

upending life work and play as we know it and it s only just getting started The rise of AI is a milestone on par with the discovery of fire the invention of the wheel and the creation of the internet In short AI is going to change everything For some that s an exciting prospect For others it s terrifying However you feel about AI there s no escaping it whether you re in a global metropolis or a farmer in rural KwaZulu Natal Dr Mark Nasila has been watching AI s ascent for over a decade studying its effects on everything from agriculture and aviation to healthcare education entertainment crime prevention energy management policy creation finance and anything in between and applying them to his role at one of South Africa s most successful financial institutions First National Bank a division of FirstRand Group African Artificial Intelligence is a comprehensive and fascinating journey tracing the rise of AI and its evolution into the emerging technology underpinning all others from connected devices and smart chatbots to the metaverse Mark combines unexpected use cases and tales of

cutting edge innovation with a unique and potent argument harnessing AI to solve Africa's problems requires embracing it from an African perspective African nations can't afford to simply import AI solutions from afar Instead Mark contends they need to rework remix and refine AI so it's able to meet uniquely African challenges in uniquely African ways and to take advantage of the once in a generation opportunity AI represents for every industry sector and person everywhere
