**The AI Advantage** Thomas H. Davenport, 2019-08-06 Cutting through the hype a practical guide to using artificial intelligence for business benefits and competitive advantage In The AI Advantage Thomas Davenport offers a guide to using artificial intelligence in business He describes what technologies are available and how companies can use them for business benefits and competitive advantage He cuts through the hype of the AI craze remember when it seemed plausible that IBM's Watson could cure cancer to explain how businesses can put artificial intelligence to work now in the real world His key recommendation don't go for the moonshot curing cancer or synthesizing all investment knowledge look for the low hanging fruit to make your company more efficient Davenport explains that the business value AI offers is solid rather than sexy or splashy AI will improve products and processes and make decisions better informed important but largely invisible tasks AI technologies won't replace human workers but augment their capabilities with smart machines to work alongside smart people AI can automate structured and repetitive work provide extensive analysis of data through machine learning analytics on steroids and engage with customers and employees via chatbots and intelligent agents Companies should experiment with these technologies and develop their own expertise Davenport describes the major AI technologies and explains how they are being used reports on the AI work done by large commercial enterprises like Amazon and Google and outlines strategies and steps to becoming a cognitive corporation This book provides an invaluable guide to the real world future of business AI A book in the Management on the Cutting Edge series published in cooperation with MIT Sloan Management Review

**AI in Health** Tom Lawry, 2020-02-05 We are in the early stages of the next big platform shift in healthcare computing Fueled by Artificial Intelligence AI and the Cloud this shift is already transforming the way health and medical services are provided As the industry transitions from static digital repositories to intelligent systems there will be winners and losers in the race to innovate and automate the provision of services Critical to success will be the role leaders play in shaping the use of AI to be less artificial and more intelligent in support of improving processes to deliver care and keep people healthy and productive across all care settings This book defines key technical process people and ethical issues that need to be understood and addressed in successfully planning and executing an enterprise wide AI plan It provides clinical and business leaders with a framework for moving organizations from the aspiration to execution of intelligent systems to improve clinical operational and financial performance

**Special Features of the UN Model Convention** Anna Binder, Viktoria Wöhrer, 2019-10-01 Detailed research on the UN Model Convention's unique features The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations Driven by the aim to achieve consistency in the international tax treaty practice the structure and content is to a large extent similar in the UN Model and the OECD Model However whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries the UN Tax Committee has continuously attempted to specifically take into

account tax treaty policies for developing countries when drafting and amending the UN Model Convention Compared to the OECD Model Convention the UN Model Convention aims at giving more weight to the source principle Popular examples are the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided Interestingly in the discussions of the tax challenges arising from the digitalization of the economy the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and or user i e the market jurisdictions As this has traditionally been the focus of the UN Model Convention its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement This book contains the master s theses of the full time LL M program 2018 2019 for which Special Features of the UN Model Convention has been chosen as the general topic With this book the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD s BEPS project on the UN Model he OECD s BEPS project on the UN Model
