Mastering CommTech Uwe Seebacher, Jörg Forthmann, Thomas Mickleit, 2025-08-30. This edited collection by over 30 industry experts and scholars explores how communication departments can digitize processes to continue contributing to their companies' success. It deals with key questions such as the necessity of digitalizing corporate communication, optimal data for success, KPI reporting solutions, and the role of data storytelling and artificial intelligence. Additionally, it covers future-relevant roles and skills, essential tools and trends, and crucial aspects of upcoming technologies that promise to change the world of corporate communications. A must-read for practitioners at all levels, this book serves as a reference for keen MBA graduates and journalists who are keen to explore corporate communications as a future career option.

The Implications of new Technology, particularly Artificial intelligence (AI) for International Politics Malam Wasai, 2023-09-18. Submitted Assignment from the year 2023 in the subject Politics General and Theories of International Politics. Language: English. Abstract: Greater scrutiny is necessary because AI will have a significant impact on international relations, such as putting new topics on the international agenda, challenging geostrategic relations, serving as a tool for diplomats and negotiators, and creating new opportunities and concerns about protecting human rights. Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis: individual, state, and international. State-level analysis examines the foreign policy behavior of states in terms of state characteristics. For example, some scholars say that all democracies behave a certain way; they don't fight with other democracies. Artificial intelligence impact governance. As AI continues to evolve and permeate various aspects of our lives, its implications for AI and how it impacts businesses. AI artificial intelligence refers to machines that can perceive, intelligence, synthesize, and infer information. It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then on the information they collect, improve themselves. Based AI is designed to significantly enhance human capabilities and contributions, making it a valuable business asset.
