**Stop Translating, Start Connecting: Small Talk for Non-Native Speakers. The book that'll make you love small talk (even if you're an introvert)** Larisa Lubimova,2025-09-18 It is not about grammar it s about human alchemy Designed for Non native speakers who want to ditch robotic phrases and speak with emotional fluency Introverts ready to trade awkward silence for the magic of intentional listening Expats and immigrants tired of feeling like outsiders in conversations This book is your cheat code to Turn cultural gaps into bridges using imperfect English as your secret weapon It s for anyone who wants to stop being a language robot

**Why Digital Transformations Fail** Tony Saldanha,2019-07-23 Former Procter Gamble Vice President for IT and Shared Services Tony Saldanha gives you the keys to a successful digital transformation a proven five stage model and a disciplined

process for executing it Digital transformation is more important than ever now that we re in the Fourth Industrial Revolution where the lines between the physical digital and biological worlds are becoming ever more blurred But fully 70 percent of digital transformations fail Why Tony Saldanha a globally awarded industry thought leader who led operations around the world and major digital changes at Procter Gamble discovered it s not due to innovation or technological problems Rather the devil is in the details a lack of clear goals and a disciplined process for achieving them In this book Saldanha lays out a five stage process for moving from digitally automating processes here and there to making digital technology the very backbone of your company For each of these five stages Saldanha describes two associated disciplines vital to the success of that stage and a checklist of questions to keep you on track You want to disrupt before you are disrupted be the next Netflix not the next Blockbuster Using dozens of case studies and his own considerable experience Saldanha shows how digital transformation can be made routinely successful and instead of representing an existential threat it will become the opportunity of a lifetime

**Artificial Intelligence and the Two Singularities** Calum Chace, 2018-04-20 The science of AI was born a little over 60 years ago but for most of that time its achievements were modest In 2012 it experienced a big bang when a branch of statistics called Machine Learning and a sub branch called Deep Learning was applied to it Now machines have surpassed humans in image recognition and they are catching up with us at speech recognition and natural language processing Every day the media reports the launch of a new service a new product and a new demonstration powered by AI When will it end The surprising truth is the AI revolution has only just begun Artificial Intelligence and the Two Singularities argues that in the course of this century the exponential growth in the capability of AI is likely to bring about two singularities points at which conditions are so extreme that the normal rules break down The first is the economic singularity when machine skill reaches a level that renders many of us unemployable and requires an overhaul of our current economic and social systems The second is the technological singularity when machine intelligence reaches and then surpasses the cognitive abilities of an adult human relegating us to the second smartest species on the planet These singularities will present huge challenges but this book argues that we can meet these challenges and overcome them If we do the rewards could be almost unimaginable This book covers Recent developments in AI and its future potential The economic singularity and the technological singularity in depth The risks and opportunities presented by AI What actions we should take Artificial intelligence can turn out to be the best thing ever to happen to humanity making our future wonderful almost beyond imagination But only if we address head on the challenges that it will raise Calum Chace is a best selling author of fiction and non fiction books and articles focusing on the subject of artificial intelligence He is a regular speaker on artificial intelligence and related technologies and runs a blog on the subject at [www.pandoras.brain.com](http://www.pandoras.brain.com) Prior to becoming a full time writer and speaker he spent 30 years in business as a marketer a strategy consultant and a CEO He studied philosophy at Oxford University where he discovered that the science fiction he had been reading since boyhood was simply philosophy in fancy dress
