Academic researchers want their research to be understood and used by non technical audiences but that requires communication that is more accessible in the form of non technical and shorter summaries The researcher must both signal the quality of the research and ensure that the content is salient by making it more readable AI tools can improve salience however they can also lead to ambiguity in the signal since true effort is then difficult to observe We implement an online factorial experiment providing non technical audiences with a blog on an academic paper and vary the actual author of the blog from the same paper human or ChatGPT and whether respondents are told the blog is written by a human or AI tool Even though AI generated blogs are objectively of higher quality they are rated lower but not if the author is disclosed as AI indicating that signaling is important and can be distorted by AI Use of the blog does not vary by experimental arm The findings suggest that provided disclosure statements are included researchers can potentially use AI to reduce effort costs without compromising signaling or salience Academic researchers want their research to be understood and used by non technical audiences but that requires communication that is more accessible in the form of non technical and shorter summaries The researcher must both signal the quality of the research and ensure that the content is salient by making it more readable AI tools can improve salience however they can also lead to ambiguity in the signal since true effort is then difficult to observe We implement an online factorial experiment providing non technical audiences with a blog on an academic paper and vary the actual author of the blog from the same paper human or ChatGPT and whether respondents are told the blog is written by a human or AI tool Even though AI generated blogs are objectively of higher quality they are rated lower but not if the author is disclosed as AI indicating that signaling is important and can be distorted by AI Use of the blog does not vary by experimental arm The findings suggest that provided disclosure statements are included researchers can potentially use AI to reduce effort costs without compromising signaling or salience **Mastering AI** Jeremy

Kahn, 2025-07-08 A Fortune magazine journalist draws on his expertise and extensive contacts among the companies and scientists at the forefront of artificial intelligence to offer dramatic predictions of AI's impact over the next decade from reshaping our economy and the way we work learn and create to unknitting our social fabric jeopardizing our democracy and fundamentally altering the way we think Within the next five years Jeremy Kahn predicts AI will disrupt almost every industry and enterprise with vastly increased efficiency and productivity It will restructure the workforce making AI copilots a must for every knowledge worker It will revamp education meaning children around the world can have personal portable tutors It will revolutionize health care making individualized targeted pharmaceuticals more affordable It will compel us to reimagine how we make art compose music and write and publish books The potential of generative AI to extend our skills talents and

creativity as humans is undeniably exciting and promising But while this new technology has a bright future it also casts a dark and fearful shadow AI will provoke pervasive disruptive potentially devastating knock on effects Leveraging his unrivaled access to the leaders scientists futurists and others who are making AI a reality Kahn will argue that if not carefully designed and vigilantly regulated AI will deepen income inequality depressing wages while imposing winner take all markets across much of the economy AI risks undermining democracy as truth is overtaken by misinformation racial bias and harmful stereotypes Continuing a process begun by the internet AI will rewire our brains likely inhibiting our ability to think critically to remember and even to get along with one another unless we all take decisive action to prevent this from happening Much as Michael Lewis s classic *The New Thing* offered a prescient insightful and eminently readable account of life inside the dot com bubble *Mastering AI* delivers much needed guidance for anyone eager to understand the AI boom and what comes next
