Heath,2025-09-08 A practical guide for teachers and students navigating the complicated intersection of artificial intelligence education and justice Artificial intelligence is rapidly integrating into today s classrooms but unlike other new technologies AI has the potential to harm making it difficult to take advantage of its benefits In Critical AI in K 12 Classrooms Stephanie Smith Budhai and Marie K Heath draw attention to the biases embedded within AI algorithms such as those powering OpenAI s ChatGPT and DALL E to guide students and teachers in developing strategies to best incorporate AI or not into equitable learning AI s reliance on existing data and knowledge systems means Black queer those with disabilities and other marginalized students are at greater risk of being harmed by built in limitations and bias Budhai and Heath show how to circumvent if not actively resist such harms as machine learning NLPs LLMS and GenAI enter the classroom with practical examples rooted in culturally sustaining abolitionist and fugitive pedagogies across disciplines Their practical guide creatively answers the concerns of educators committed to forward thinking yet fair instruction and the needs of students eager to use AI for just ends Critical AI in K 12 Classrooms meets the challenges of a key STEM technology with an eye toward cultivating a more just world Balancing responsible learning with the joy of discovery Budhai and Heath build a framework for AI instruction that all educators can confidently use **Culturally Competent Kids** Samantha Sweeney,2025-05-06 A book for parents that provides a science based framework for helping to raise CULTURALLY COMPETENT KIDS This book is for the parent who knows that culture is important It is for the parent who wants to teach

their child about the world around them but doesn't know where to start. Let this book be your starting point and your guide. The goal of Culturally Competent Kids is to help you raise your children to become adults who respect and celebrate differences rather than simply tolerating them. Research shows that while biases begin to develop at age 6, their origins begin much earlier. Unfortunately, diversity and culture are treated as though they are grown-up concepts as if children don't recognize that diversity is all around them. Human beings naturally categorize, and your kids will develop preferences, prejudices, and opinions about people who are different from them. Therefore, it is important for parents to take an active role in helping their children see, understand, and develop their understanding of people and cultures that are different. As Dr. Sweeney says, "We don't have to all be friends or even like each other to treat each other with respect." This book provides a science-based framework with ideas and options to explore as you embark on this cultural competence journey with your kids and also with yourself.
