Thomas H. Davenport, Julia Kirby, 2016-05-24 An invigorating thought provoking and positive look at the rise of automation
that explores how professionals across industries can find sustainable careers in the near future Nearly half of all working
Americans could risk losing their jobs because of technology It s not only blue collar jobs at stake Millions of educated
knowledge workers writers paralegals assistants medical technicians are threatened by accelerating advances in artificial
intelligence The industrial revolution shifted workers from farms to factories In the first era of automation machines relieved
humans of manually exhausting work Today Era Two of automation continues to wash across the entire services based
economy that has replaced jobs in agriculture and manufacturing Era Three and the rise of AI is dawning Smart computers
are demonstrating they are capable of making better decisions than humans Brilliant technologies can now decide learn
predict and even comprehend much faster and more accurately than the human brain and their progress is accelerating
Where will this leave lawyers nurses teachers and editors In *Only Humans Need Apply* Thomas Hayes Davenport and Julia
Kirby reframe the conversation about automation arguing that the future of increased productivity and business success isn t
either human or machine It s both The key is augmentation utilizing technology to help humans work better smarter and
faster Instead of viewing these machines as competitive interlopers we can see them as partners and collaborators in
creative problem solving as we move into the next era The choice is ours PC AI, 1997 *The Undersea Journal*, 1997
