Handbook of Research on Collaborative Teaching Practice in Virtual Learning Environments Panconesi, Gianni, Guida, Maria, 2017-05-17 Modern technology has enhanced many aspects of life including classroom education. By offering virtual learning experiences, educational systems can become more efficient and effective at teaching the student population. The Handbook of Research on Collaborative Teaching Practice in Virtual Learning Environments highlights program developments in the realm of digital worlds in educational settings. Featuring pedagogical methods and topics relating to cooperative learning, hands-on curriculum, and meta-cognitive dimensions, this publication is a critical reference source for pre-service and in-service teachers, school administrators, higher education faculty, and researchers interested in virtual reality incorporation in the classroom.

A Model of Teacher Professional Development Susan Rodrigues, 2005 Teacher professional development is usually directed and governed by three agents: politics, pedagogy, and innovation. The book begins by considering existing literature and ideas on teacher professional development. Chapter two briefly outlines some of the issues in science education that are of relevance to primary school science, while also examining the PIPS model of teacher professional development. Subsequent chapters focus on the methodology employed by the project, including details of the evaluation, as the data collected was instrumental in determining influential facets of the project. The following chapters explore the notion of readiness, risk, reflection, recognition, resource, and relevance. These were deemed to be key elements that contributed to the success of the project in terms of promoting professional development and in terms of seeing tangible change in classroom practice. There is a short chapter which outlines some of the other project findings, and the book concludes with a chapter on the need and challenge for dynamic teacher professional development programmes that work in partnership with teachers rather than deliver things for teachers.
