**Financial Management in the Sport Industry** Matthew T. Brown, Daniel A. Rascher, Mark S. Nagel, Chad D. McEvoy, 2021-04-07 Now in a fully revised and updated third edition this essential textbook introduces the fundamentals of sport finance and sound financial management in the sport industry. It is still the only textbook to explain every aspect of finance from the perspective of the sport management practitioner, explaining key concepts and showing how to apply them in practice in the context of sport. The text begins by covering finance basics and the tools and techniques of financial quantification using industry examples to apply the principles of financial management to sport. It then goes further to show how financial management works specifically in the sport industry. Discussions include interpreting financial statements, debt and equity financing, capital budgeting, facility financing, economic impact, risk and return, time value of money and more. The final part of the book examines financial management in four sectors of the industry: public sector, sport, collegiate athletics, professional sport and international sport. It provides an in-depth analysis of the mechanics of financial management within each of these sport sectors. Useful features such as sidebars, concept checks, practice problems, case analysis and case questions will help students engage more deeply with financial techniques and encourage problem-solving skills. This new edition includes a completely new chapter on international sport reflecting the globalized nature of the modern sport industry as well as expanded coverage of current issues such as digital media finance, recent legal cases affecting collegiate sport and the central importance of collective bargaining. *Financial Management in the Sport Industry* is an essential textbook for any undergraduate or postgraduate course in sport finance and an invaluable supplement to any course in sport business or sport management. It is also an important reference for all sport management practitioners looking to improve their understanding of finance. The book is accompanied by updated and expanded ancillary materials including an instructor's manual, PowerPoint slides and an image bank.

**Sales Management** Kenneth Le Meunier-FitzHugh, Kieran Sheahan, 2023-06-02 Sales are the lifeblood of the business world and therefore an area of fundamental importance for scholarly research. This concise book analyses current thoughts and emerging practices in sales management research. Organisations who are looking to increase revenues and add new customers to their portfolio will find it increasingly difficult to successfully do this without being aware of and adopting the appropriate adaptive sales processes. Emergent themes such as agile sales management, digital selling, artificial intelligence and trust will be discussed in the book that also embraces the importance of customer relationship management and how salespeople are aligning their interactions with the marketing function. The text will review recent research to identify how to grow and organise the sales pipeline, manage hybrid sales teams and the effects of new technologies on selling processes. These discussions will be helpful in highlighting issues and providing some solutions to practitioners who are operating in new environments. This book will be invaluable to sales researchers as it summarises current knowledge about key sales and sales management topics and indicates possible future research directions.
