The AI Mint Erdem Cırık, 2025-11-22 WARNING THIS BOOK IS DESIGNED TO SAVE YOU FROM BEING AN EMPLOYEE AND TURN YOU INTO A SYSTEM OWNER If you still rely

on a paycheck in your wallet as we enter 2026 you are in grave danger The AI revolution has begun and it is wiping out the middle class You will either use this technology to build your own mint or you will work for minimum wage for those who do The AI Mint is a TECHNICAL PRACTICAL and ACTION ORIENTED guide written for those dreaming of making money online but don't know where to start No empty motivation Just coding without knowing code setting up bots that sell while you sleep and earning dollars WHAT WILL YOU LEARN IN THIS BOOK This book is a 200 page Digital War Manual It contains over 150 business models and technical setups you can launch with zero capital CHAPTER 1 CHOOSE YOUR WEAPON N8N it is an execution guide that will stay open on your desk TIME IS RUNNING OUT The AI train has already left the station and it's speeding up This book might be your last ticket to jump on board Are you ready to build the system that will change the rest of your life for the price of a pack of cigarettes DOWNLOAD NOW AND START THE MINT TOPICS AND TECHNOLOGIES COVERED IN THIS BOOK AI Technology Generative AI Agentic AI Autonomous Agents ChatGPT Claude Gemini Midjourney ElevenLabs N8N Automation Python Scripting Web Scraping Prompt Engineering Business Models Entrepreneurship Micro SaaS Development Solo Agency Setup Faceless YouTube Channels Content Factory Digital Marketing Growth Hacking Dropshipping 2.0 E Commerce Automation Finance Globalization Making Money Online Passive Income Streams Global Payment Solutions Wise Lemon Squeezy Selling Globally Earning in Dollars Startup Launch Target Audience Entrepreneurs Students Freelancers White Collar Workers Developers and Digital Nomads looking for the 2026 Vision **Successful Process Mining Projects** Roland Woldt, 2025-09-15 Driving blind and too fast or not fast enough Most organizations have a hard time seeing where their performance lacks They see the metrics from the past but don't have visibility into how these numbers were produced What went well and what did not go so well and why So they have no idea how to improve their processes Do organizations measure the performance of their processes Well often I see only some lagging metrics being measured There are almost no predictive measures being defined and processes are not adapted to changing situations for example when it comes to delays of a supplier shipment There are just a few organizations that actually have their processes formally designed in the form of process models And those who do might see them only as an exercise to appease the gods their management or the regulators This creates interesting results when it comes to audits some poor souls figuring out what actually happens which might lead to regulatory notes that you have not made enough progress or even to hefty fines Overall I am missing an awareness of the need to measure what you are doing Some smart person once said You can only measure what you see and how boring would a football match be if we had not defined what winning means and how you can create the necessary points on the scoreboard Process Intelligence a new frontier for Process Management Over the last couple of years I have seen more interest in addressing these issues Process mining is the speedometer for your business It gives you visibility into how your processes are executed Not only the happy path that you might or might not have documented but all variations that you get from your runtime systems Process mining gives you calculated performance

metrics out of the box like frequencies and times and shows you where you have rework or other unwanted behaviors Dashboards show metrics that allow you to investigate your performance hypotheses Data from mining can be embedded in existing BI dashboards You can trigger actions from thresholds and interact with running process instances think notifications alerts or transactions Process mining is embedded in a larger BPM practice You can download discovered processes to use for future state design or simulation Or you upload reference processes and the tool checks to what degree you have conformed to how the work should be done Mining technologies close the missing gap in the process lifecycle and provide a data driven analysis approach for performance management Who is this book for This book is for people who are serious about how they can improve how their organizations run and how they can make their next large transformation project a success It is for the process and architecture practitioners who run their programs for years and don't get the visibility that they deserve It is for the analysts who want to switch their practices to a data driven approach while not forgetting the human contributions in the analysis and for whom the words Digital Gemba sound good And it is for the curious folks who have heard about process intelligence and were wondering what this means and how this fits into their organizations without creating another hype and disappointment when the results of the first project do not meet expectations As you know the first time you do something you most likely suck and that is the same here But wait this is not all This book also comes with an accompanying website which includes additional tools all graphics as PDF and a checklist for your mining projects It also comes with the necessary source files data workflows reference models in BPMN format an ARIS database and an ARIS Process Mining project
