Survival: One Health,

One Planet, One Future George R. Lueddeke, 2018-09-17 Planet Earth has been here for over 4.5 billion years but in just two human generations we have managed to place our only home at great risk. Many lessons from history have not yet been learned and new lessons may prove equally if not more difficult to take on board as we head deeper into the twenty-first century. This book highlights two of our greatest social problems: changing the way we relate to the planet and to one another, and confronting how we use technology for the benefit of both humankind and the planet. Covering a wide range of key topics including environmental degradation, modern life, capitalism, robotics, financing of war vs peace, and the pressing need to re-orient society towards a sustainable future, the book contends that lifelong learning for sustainability is key to our survival. The author argues that One Health, recognising the fundamental interconnections between people, animals, plants, and the environment, needs to inform the UN 2030 Sustainable Development Goals and that working towards the adoption of a new mindset is essential. We need to replace our current view of limitless resources, exploitation, competition, and conflict with one that respects the sanctity of life and strives towards well-being for all, shared prosperity, and social stability. Clearly written, evidence-based, and transdisciplinary, and including contributions from the World Bank, InterAction Council, Chatham House, UNESCO, World Economic Forum, the Tripartite One Health collaboration, UN Food and Agriculture Organization, World Organisation for Animal Health, and World Health Organization, One Health Commission, and more, this book cuts across sociopolitical, economic, and environmental lines. It will be of great interest to practitioners, academics, policy makers, students, nongovernment agencies, and the public at large in both developed and developing nations.
