[Python for Algorithmic Trading Cookbook](#) Jason Strimpel, 2024-08-16

Harness the power of Python libraries to transform freely available financial market data into algorithmic trading strategies and deploy them into a live trading environment

Get With Your Book PDF Copy AI Assistant and Next Gen Reader Free

Key Features Follow practical Python recipes to acquire visualize and store market data for market research Design backtest and evaluate the performance of trading strategies using professional techniques Deploy trading strategies built in Python to a live trading environment with API connectivity

Book Description Discover how Python has made algorithmic trading accessible to non professionals with unparalleled expertise and practical insights from Jason Strimpel founder of PyQuant News and a seasoned professional with global experience in trading and risk management

This book guides you through from the basics of quantitative finance and data acquisition to advanced stages of backtesting and live trading. Detailed recipes will help you leverage the cutting edge OpenBB SDK to gather freely available data for stocks, options and futures and build your own research environment using lightning fast storage techniques like SQLite, HDF5 and ArcticDB. This book shows you how to use SciPy and statsmodels to identify alpha factors and hedge risk and construct momentum and mean reversion factors. You'll optimize strategy parameters with walk forward optimization using VectorBT and construct a production ready backtest using Zipline Reloaded. Implementing all that you've learned, you'll set up and deploy your algorithmic trading strategies in a live trading environment using the Interactive Brokers API, allowing you to stream tick level data, submit orders and retrieve portfolio details. By the end of this algorithmic trading book, you'll not only have grasped the essential concepts but also the practical skills needed to implement and execute sophisticated trading strategies using Python. What you will learn: Acquire and process freely available market data with the OpenBB Platform. Build a research environment and populate it with financial market data. Use machine learning to identify alpha factors and engineer them into signals. Use VectorBT to find strategy parameters using walk forward optimization. Build production ready backtests with Zipline Reloaded and evaluate factor performance. Set up the code framework to connect and send an order to Interactive Brokers. Who this book is for: Python for Algorithmic Trading Cookbook equips traders, investors and Python developers with code to design, backtest and deploy algorithmic trading strategies. You should have experience investing in the stock market, knowledge of Python data structures and a basic understanding of using Python libraries like pandas. This book is also ideal for individuals with Python experience who are already active in the market or are aspiring to be. "Looks Good to Me" Adrienne Braganza, 2025-01-07. Deliver code reviews that consistently build up your team and improve your applications.
