carried out as research for the report indicate that access to jobs along with physical security is their biggest concern. Far too many young people, some 130 million 15-24 year olds, cannot read or write. Secondary education and skill acquisition make sense only if primary schooling has been successful. This is still far from being the case and efforts have to be reinforced in this area. In addition, more than 20 percent of firms in countries such as Algeria, Bangladesh, Brazil, China, Estonia, and Zambia rate poor education and work skills among their workforce. Overcoming this handicap starts with more and better investments in youth. The report highlights three areas to promote better investment in the future: expanding opportunities, enhancing capabilities, and providing second chances. Expanding opportunities focuses on increasing the quality of education, smoothing the transition to work, and providing young people with a platform for civic engagement. Enhancing capabilities involves making young people aware of the consequences of their actions, especially consequences that will affect them much later in life, as well as building their decision-making skills and giving them the right incentives. Providing second chances calls for helping young people recover from missed opportunities through remedial education, retraining, treatment, and rehabilitation.

*Top 300 Careers*, 2008. Explore hundreds of careers, assess your best career fit, and land a job fast with this extensive authoritative resource. In one time-saving volume, job seekers and students find everything they need to research careers, learn about pay outlook, education, and skills needed for about 300 jobs, match their personal skills to the jobs, and take seven steps to land a good job in less time. This book provides thorough, current, and interesting descriptions for all major jobs covering about 90 percent of the workforce. A special book within a book section by career and job search author Michael Farr describes the seven steps that cut job search time in half and includes sample resumes. An assessment matches your personal skills with the characteristics of the occupations described in the book.

*Digital Nomads. How the era of digitalization creates alternative lifestyles*. Lisa-Marie Wagner, 2020-06-18. Bachelor Thesis from the year 2020 in the subject Business economics, Business Management, Corporate Governance, grade 1.6, language English, abstract. In this paper, the phenomenon of digital nomadism in permanent employment is presented. In general, digital nomads are characterized by their independence of location, their employment in the digital space, and common values. Most of them are freelancers and entrepreneurs, but also employees who are part of this movement want to leave the conservative concept of normal employment and break new ground. First, the changes in the business world and the emergence of digital nomadism were presented in this paper. Due to a lack of literature, guideline-based expert interviews were conducted to gain insight into the opportunities and risks of the multi-local lifestyle concept for employees and companies. In addition, the framework conditions for companies and digital nomads required by this work and life concept were examined and presented in detail. Such a framework condition can mean, for example, the adaptation of processes and leadership. There are also differences between completely remote companies and only partially remote companies, which can lead to a split company structure. In this context, the similarities and differences between traditional telework and digital nomadism in permanent employment were

also examined These are similar for example regarding the technical prerequisites that should be created in companies and the changed communication In addition there are challenges and opportunities that arise from the travel component and the nature of digital nomadism such as negatively impaired processes due to time differences or certain characteristics and experiences that digital nomads possess or experience that can be used positively in a professional context Thus this work not only serves a scientific purpose but also provides a practical framework for employing digital nomads in traditional companies
