Saeger,2018-08-24 It s beyond dispute that trolls and automated bots helped Donald Trump win the White House in 2016 Some of the troll operations involved were based in Russia but domestic interests also participated in the invasion In fact trolls of all types from all corners of the internet came together in a perfect storm of propaganda disinformation and political dissent The confusion wrought by the multi pronged troll invasion still affects our online spaces today leaving many questions unanswered Who are the trolls What do they want How do they operate Why couldn t our intelligence agencies put a stop to Russian and right wing trolling Can trolling be stopped And what s with all the freakin Nazis One thing is certain the troll invasions wouldn t have succeeded if America hadn t been divided on many pressing issues Deep cultural woes such as

racism our New Generation Gap and the slow destruction of the middle class were part of the toxic environment that allowed trolls to flourish This book the first from software expert award winning internet troll and long time underground culture fixture Eric Saeger examines all these issues with an impartial eye The limitations and realities of current technology are explained in clear simple language revealing the tactics of everyday trolls and describing how future technology promises to make the internet a safe livable place for everyone Most important of all along the way you ll see the humor in our dire but salvageable situation Once we understand the invaders we ll no longer fear RUSSIAN NAZI TROLL BOTS **Innovation Sucks!** Alan Watkins, Simon May, 2021-03-14 Businesses spend billions on innovation with very little to show for their investment or effort This book challenges some of the ingrained truths of innovation and suggests a different approach Innovation is not the creation of a novel idea It is the successful commercialisation of that novel idea Rather than starting with a costly time consuming problem assessment that seeks to push potential solutions through an innovation funnel an impeller approach starts with possible solutions and gets the market to pull the best ones forward so they can fail fast or flourish fast This approach is made possible by the addition of a bee a new type of integrative thinker who can harvest the existing knowledge from the meadow of experts Completely reversing the innovation process means organisations are much better placed to win in the market rather than focusing on finding theoretical solutions or clearing innovation stage gates In addition this approach also recognises that the people who shepherd the solution through the ideation and testing stage are not the same people who must then take that solution to market for successful commercialisation Given the current innovation failure rate coupled with the fact that society is beset with multiple wicked problems it s time to think differently and innovate innovation itself This book is essential reading for Heads of Innovation and Commercialisation Directors of Marketing Heads of New Product Development and New Service Development Strategy Directors Chief Technology Officers Government advisers and policy makers *Streamponks* Robert Kyncl, Maany Peyvan, 2017-09-05 An entertainment and tech insider YouTube s chief business officer delivers the first detailed account of the rise of YouTube the creative minds who have capitalized on it to become pop culture stars and how streaming video is revolutionizing the media world In the past ten years the internet video platform YouTube has changed media and entertainment as profoundly as the invention of film radio and television did more than six decades earlier Streamponks is a firsthand account of this upstart company examining how it evolved and where it will take us next Sharing behind the scenes stories of YouTube s most influential stars Streamponks like Tyler Oakley Lilly Singh and Casey Neistat and the dealmakers brokering the future of entertainment like Scooter Braun and Shane Smith Robert Kyncl uses his experiences at three of the most innovative media companies HBO Netflix and YouTube to tell the story of streaming video and this modern pop culture juggernaut Collaborating with Google speechwriter Maany Peyvan Kyncl explains how the new rules of entertainment are being written and how and why the media landscape is radically changing while giving aspiring Streamponks some necessary advice to launch their own new media careers Kyncl
