Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates?

Huong Hoang Thien, 2023-05-25 Master's Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1.0 language English abstract What will happen if there aren't enough talents to fill the market in the future due to the demographical change This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany An empirical study has been conducted as an online survey to gain an overview of Germany's 100% remote job market In a fast changing world digital transformation has become an evitable process for companies to adapt to new technologies and market trends The digital transformation in Germany has been significantly impacted by the COVID 19 pandemic positively and negatively On the one hand the pandemic forced German companies to embrace new technology more quickly and adapt to remote work However on the other hand it pointed out Germany's weaknesses in digital infrastructures and cybersecurity Additionally many German companies face a shortage of workers due to digital transformation Another reason that causes workforce shortage is demographical change Companies cannot operate their business correctly increase revenue or drive innovations to survive in a competitive market without suitable candidates Furthermore the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences Therefore companies must know them and their work preferences to fill the workforce shortage gap Remote working as a sub trend of the mega trend New Work has become the new standard for workers especially since the pandemic However there aren't any specific regulations regarding remote work in Germany yet In general remote work provides workers e.g. more freedom and a better work life balance Nevertheless remote work also has the downside such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers less productivity outside of the office etc For companies offering remote work gives them complete access to the talent pools including freelancers as external workers reducing costs due to fewer offices being more attractive to job seekers But on the other side remote leadership has become a big challenge for leaders Furthermore companies have to deal more with cyber security When everything's going remotely companies have become an easier target of cyber attacks

Human Diversity in Education Kenneth Cushner, Averil McClelland, Hyla Cushner, Philip L. Safford, 2021-03 It is difficult to fathom the myriad changes that have occurred and that influence the content of this book in just three years since the previous edition As this book goes to press we have witnessed many nations in Europe as well as the United States that have made dramatic political shifts from open and liberal leanings to more populist nationalistic and conservative ideologies These shifts have been accompanied by an increase in xenophobia and stricter actions to reduce immigration often accompanied by a rise in anti immigrant anti Semitic and Islamophobic sentiment The conflicts and struggles in Afghanistan Iraq and Syria continue as tensions between the United States and Russia fester A questioning of Truth with an onslaught of fake news has emerged having a major influence on the 2016 U S presidential election And we expect numerous changes to occur under the new U S Secretary of Education Betsy DeVos And these challenges are in the political arena alone Across the planet people continue to feel the stresses of the seemingly endless changes and challenges they confront on many fronts Climate change continues to advance resulting in

new and unpredictable weather patterns despite a vocal minority that appears to deny its existence Although making gains people continue to wrestle with questions surrounding same sex marriage and gay rights the question of health care the accelerated identification of children with autism and other disabilities as well as our aging population span cultural differences and cut across geographic political and social boundaries continuing to impact us all at the local national and global levels Some people are eager to embrace innovation and change while others struggle through a variety of political and social means to retain older and more traditional ways of doing things Such challenges continue to enter and impact our increasingly culturally diverse classrooms and communities To effectively address and solve the multitude of issues we face it is incumbent upon teachers to provide young people with a foundation that will assist them to better understand the complex nature of the world in which they will live while developing the skills that will enable them to be proactive problem solvers in an interdependent global society This requires people who have the knowledge skills and motivations to reach beyond their own cultural boundaries and a willingness and ability to collaborate with others If people are not willing and able to do so these and other future problems simply will not be solved Developing intercultural understanding and competence must be actively addressed throughout the school curriculum This tenth edition of Human Diversity in Education An Intercultural Approach continues to focus on the preparation of teachers and other human service providers who can interact effectively with the wide diversity of people they are certain to encounter and who are able to transmit this knowledge and skill to the individuals in their charge
