Handbook of Online Learning Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute s focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there s a need for resources that will help them adapt to this new teaching method Educators who

come out of traditional academic institutions tend to use traditional methods when offering courses online e.g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments

Effective Group Discussion Gloria J. Galanes, John K. Brilhart, 2004 Written for the small group communication course Effective Group Discussion combines the most recent research findings relevant to understanding small groups with the practical tools students need to become productive group members This text s implementation of research and theory in the systems a

Designing Portals Ali Jafari, Mark C. Sheehan, 2003 Portals present unique strategic challenges in the academic environment Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution Building a portal is as much about constructing intra campus bridges as it is about user interfaces and content Designing Portals Opportunities and Challenges discusses the current status of portals in higher education by providing insight into the

role portals play in an institution's business and educational strategy by taking the reader through the processes of conceptualization design and implementation of the portals in different stages of development at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere
