**Advances in Offshore Structural Engineering: AI Design, Vibration Control, and FRP Retrofit Solution** Dr. Ahmed ElHamahmy, 2025-07-25 Advances in Offshore Structural Engineering AI Design Vibration Control and FRP Retrofit Solutions brings together three cutting edge research studies addressing the evolving challenges in offshore platform design safety and structural enhancement The first chapter explores the integration of Artificial Intelligence AI into offshore structural engineering It highlights how AI based modeling optimization and decision making tools can improve design efficiency enhance safety and reduce lifecycle costs From conceptual design to structural health monitoring AI is shown as a transformative force for offshore projects The second chapter focuses on vibration mitigation caused by rotating equipment on offshore platforms These dynamic forces can lead to fatigue operational issues and reduced service life The chapter presents advanced retrofit strategies such as structural bracing and damping systems to control vibration levels and ensure continued platform integrity The third chapter discusses the application of Fiber Reinforced Polymer FRP composites in retrofitting offshore structures FRP offers advantages like high strength to weight ratio corrosion resistance and ease of installation Design approaches long term performance and sustainability benefits are covered providing a strong case for FRP in harsh marine environments This book serves as a vital reference for engineers project managers and researchers in the oil and gas industry Whether involved in new designs or upgrades of aging infrastructure readers will gain valuable insight into applying modern tools and materials to improve safety performance and sustainability in offshore structural systems

*Enabling People-Centered Risk Communication for Geohazards* Alessandro Amato, Sally H. Potter, Anna Scolobig, Eric M. Thompson, 2024-07-18 In the field of natural hazards communicating science with the public and stakeholders involves entering the challenging and complex world of hazard and risk communication the ultimate purpose of which is to reduce the impact of impending hazards on people at risk According to the Sendai

Framework 2015 2030 it is important to strengthen the utilization of media including social media traditional media big data and mobile phone networks to support national measures for successful disaster risk communication Sometimes risk communication has collateral and unexpected side effects that may lead to the adoption of inadequate behaviors In some instances this can even result in legal actions being taken against scientists and or emergency managers The role of the media should be to facilitate the accurate communication of hazard and risk information but such communication is often hampered by the fact that journalists have different agendas and priorities than scientists risk communicators and emergency managers This does not always support people in their decision making Accurate communication of hazard and risk is especially important when decisions have to be made within contexts where uncertainty is very high This is often the case with geohazards such as earthquakes tsunamis volcanic eruptions and landslides
