Inflight Catering Management:

Inflight Catering Management Audrey Carol McCool, 1995 The first and only comprehensive guide to the field of INFLIGHT CATERING MANAGEMENT Inflight catering has over the past thirty years evolved into a distinct branch of the noncommercial foodservice industry complete with its own unique set of equipment preparation storage disposal and distribution requirements Yet until now there were no books devoted exclusively to the needs of foodservice management professionals and students interested in pursuing a career in this fascinating and highly lucrative field This book fills that gap Written with the full support and cooperation of the Inflight Food Service Association s Education Committee Inflight Catering Management is both a valuable professional resource and an excellent text for noncommercial foodservice management courses It provides comprehensive coverage of all essential aspects of contemporary inflight foodservice operations including Bidding contract management and the airline caterer interface Caterers equipment and facilities Onboard equipment and facilities Quality assurance Food safety and sanitation Waste management Current and future career opportunities *Operations Management on the Airport Perimeter. In-flight Catering and Services* Patrick Wiget, 2021-01-28 Academic Paper from the year 2019 in the subject Business economics Business Management Corporate Governance grade 69 language English abstract This paper refers to a catering supplier called creative catering Ltd CC based in Basel Switzerland In 2015 they opened a new branch called In flight Services and Catering ISC providing services to the in flight industry ISC serves on a high class level to private corporate governmental and royal customers from an international setting with multicultural backgrounds who do not have a local airline service for their needs ISC cannot be compared to the more basic services provided on first class charter flights CF because it provides to a smaller audience focusing much more on individual needs than a CF ISC is delivering up to four flights a day to small business jets and wide body long haul aircraft In 2018 the ISC generated a revenue of CHF 280 000 which is about a fourth of the CC total income The combination of services and goods provided by ISC in relation with the difficult forecasting situation will be discussed thoroughly throughout the paper This difficult relationship shows how important a clearly defined operations management and process setup is Catering is the largest part of the branch therefore this paper mainly considers the in flight catering sector with its process of the ordering system discussing the vulnerability and challenges within the system and analysing a lean approach to improve its performance and evaluate new findings *Developments in Tourism Research* David Airey, John Tribe, 2007-09-20 This book aims to be a showcase for cutting edge research offering a high edited selection of the best paper submitted to the 2006 tourism conference at the University of Surrey which itself is a celebration of 40 years of tourism education at the University The emphasis of the book is on contributions which offer new insights and approaches to tourism research rather than case studies or applications of existing research methods to new contexts and this is where the book is unique **Digital Transformation in Aviation, Tourism and Hospitality in Southeast Asia** Azizul Hassan, Nor

Aida Abdul Rahman, 2022-11-17 Technological advances and the drive to digitalize business processes in aviation tourism and hospitality have forced the industries to go along with the digital movement. The results are often mixed. This book brings together contributions from leading scholars in the field and explores the digital transformation in these industries in Southeast Asia. The book looks at the impact of digital transformation on the region and the issues and challenges brought about by this transformation. It also addresses trends in the industries from blockchain technology, AI, biometric and mobile technology applications to in-flight catering. It examines the impact of COVID-19 on the industries and how the pandemic has led to businesses adopting new business models. Through the case studies of digital adoptions in the region, readers will gain insights on how the countries have leveraged new technologies and the implementation processes to drive digital transformation. The book aims to help scholars and policy makers understand the digital advances in the industries to better formulate responses in research and policy making and deliver effective digital transformation. *Technology Application in Aviation, Tourism and Hospitality* Azizul Hassan, Nor Aida Abdul Rahman, 2022-10-22 This book covers multiple areas such as technology and the type of application in aviation tourism and hospitality with looking at current and future technology application as well as in a rural tourism perspective. The strength of this book comes from the authors themselves coming from multiple higher institutions in Malaysia and Indonesia as these two countries are the top two countries in Southeast Asia with the world's most popular tourist destinations and for a reason: a tropical climate, rich culture, gorgeous beaches, wonderful food, and low prices. This book is also packed with detailed knowledge in the area of air travel as well as deep understanding on the related theories used as theoretical underpin in performing air travel research. This book provides insightful discussion and is very beneficial to the reader. This book is suitable for the following readers: general students, travelers, academics, tourism consultants, aviation regulators, aviation practitioners, and ministries of tourism. Readers are also exposed to recent issues and development pertaining technology application in aviation tourism and hospitality, theoretical discussion related to technology application as well as its application and future research application. **Food in the Air and Space** Richard Foss, 2014-12-11 In the history of cooking, there has been no more challenging environment than those craft in which humans took to the skies. The tale begins with meals aboard balloons and zeppelins where cooking was accomplished below explosive bags of hydrogen, ending with space station dinners that were cooked thousands of miles below. This book is the first to chart that history worldwide, exploring the intricacies of inflight dining from 1783 to the present day aboard balloons, zeppelins, land-based aircraft, and flying boats, jets, and spacecraft. It charts the ways in which commercial travelers were lured to try flying with the promise of familiar foods, explains the problems of each aerial environment, and how chefs, engineers, and flight crew adapted to them, and tells the stories of pioneers in the field. Hygiene and sanitation were often difficult, and cultural norms and religious practices had to be taken into account. The history is surprising and sometimes humorous; at times, some ridiculous ideas were tried, and airlines offered some strange meals to try.
