

# Agilent 8453 UV-vis Spectrometer

## Introduction

The Agilent 8453 UV-Vis instrument is a simple but powerful diode-array spectrophotometer capable of quickly acquiring data in the spectral range from 190 to 1100 nanometers.

## Agilent 8453 UV-Vis Spectrophotometer

### Instrument Startup

1. Turn on the PC and monitor.
2. Login as Agilent 8453 with password bi019.
3. Turn on the instrument. The switch is at the lower left corner.
4. Wait until the spectrometer has made some clicking noises.
5. Double-click on the UV-Vis program icon to start the program.
6. A program login box will appear. We do not use this feature of the software. Simply press "cancel" or "ok".
7. The software should now open in the standard view with visible lamp lit.
8. If you need to take a spectra below about 400 nm click on the UV lamp icon to turn it on. The lamp takes a few seconds to light. You should allow the lamps to stabilize for about 15–20 minutes. If the exact absorbance is not important you can begin measurements immediately.
9. For wavelengths below 350nm both lamps are needed.
10. For the visible region there are sample cuvettes in the cabinet above the instrument. If you need UV/quartz cuvettes you need to purchase your own.
