Revolutionizing World Trade Kati Suominen, 2019-11-19 Almost 15 years ago in The World is Flat Thomas Friedman popularized the latest wave of globalization as a world of giant corporate supply chains that tripled world trade between 1990 and 2010 Major corporations such as Apple Dell and GE offshored manufacturing to low cost economies China became the world's factory mass producing and exporting computers and gadgets to Western shoppers This paradigm of globalization has dominated global trade policy making and guided hundreds of billions of dollars in business investments and development spending for almost three decades But we are now on the cusp of a new era Revolutionizing World Trade argues that technologies such as ecommerce 3D printing 5G the Cloud blockchain and artificial

intelligence are revolutionizing the economics of trade and global production empowering businesses of all sizes to make move and market products and services worldwide and with greater ease than ever before The twin forces of digitization and trade are changing the patterns players politics and possibilities of world trade and can reinvigorate global productivity growth However new policy challenges and old regulatory frameworks are stifling the promise of this most dynamic prosperous and inclusive wave of globalization yet This book uses new empirical evidence and policy experiences to examine the clash between emerging possibilities in world trade and outdated policies and institutions offering several policy recommendations for navigating these obstacles to catalyze growth and development around the world

Influence of WTO and Global Dynamics on Trade Flows Debashis Chakraborty, Oindrila Dey, 2024-10-10 p This book is a machine generated literature overview that explores the impact of the World Trade Organization WTO on international trade and its development It looks at international trade before and after 1995 when WTO was established It highlights the journey of the reciprocity based reforms under WTO that were expected to help the developing and less developed countries LDCs more vis vis their developed counterparts given the existence of systemic and structural bottlenecks in the latter territories The enabling steps were further expected to promote exports from developing countries and LDCs in line with their comparative advantage patterns enhance the wage level and in turn facilitate development of local population The book showcases how during the first decade after WTO inception a considerable progress was made for facilitating exports from the lower and lower middle income countries through crucial provisions like less than full reciprocity LTFR Generalized System of Preferences GSP support measures under Aid for Trade zero duty preferences under Special and Differential Treatment SDT and so on However the pace of WTO reforms has slowed down in the aftermath of the sub prime crisis in 2008 09 and subsequent focus on formation of regional trade agreements RTAs In particular in the aftermath of Covid 19 a trend towards de globalization has been noticed with considerable ramifications for the development of lower income countries In this background there is a need to analyze how the deepening of trade flows and the subsequent de globalization waves in the
