

DfE Non-statutory Mathematics guidance (June 2020) – Ready-to-progress criteria match to Busy Ant Maths Year 3 Medium-Term Plans

On 6 July, 2020 the DfE published new non-statutory guidance aimed at helping teachers to plan teaching the statutory mathematics national curriculum in England for Key Stages 1 and 2 (<https://www.gov.uk/government/publications/teaching-mathematics-in-primary-schools>).

The guidance:

- is intended to support teaching
- brings greater coherence to the national curriculum by identifying core concepts in the national curriculum and demonstrating progression from year 1 to year 6
- summarises the most important knowledge and understanding within each year group and highlights important connections between these mathematical topics
- can be used alongside other high-quality plans and resources, including textbooks
- may be helpful in planning and prioritising the curriculum following the coronavirus (COVID-19) outbreak.

In the publication, the important conceptual knowledge and understanding that pupils need as they progress from year 1 to year 6 are referred to as 'Ready-to-progress criteria', and provide a coherent, linked framework to support pupils' mastery of the primary mathematics curriculum.

It should be noted that the publication does not address the whole of the primary curriculum, but only the areas that have been identified as a priority. It is still a statutory requirement that the whole of the curriculum is taught. However, by meeting the ready-to-progress criteria, pupils will be able to more easily access many of the elements of the curriculum that are not covered by this guidance.

This document aims to identify which units in *Busy Ant Maths Year 3* link to the Year 3 'Ready-to-progress criteria'. Used in conjunction with the DfE publication, it helps support teachers in planning and assessing the mathematics national curriculum.

At the long-term planning stage, they can be used to ensure that the most important elements that underpin the curriculum are covered, and to ensure that there is continuity and consistency for pupils as they progress from one year group to the next.

At the medium-term planning stage, teachers can use the guidance to identify connections between mathematical ideas and develop understanding based on logical progression and to use this information to inform decisions on how much teaching time to set aside for the different parts of the curriculum. Teaching time can be weighted towards the 'Ready-to-progress criteria'. This may be of particular help to teachers following the coronavirus (COVID-19) outbreak.

Along with the 'Record-keeping formats' and 'Tracking back and forward through the Mathematics National Curriculum attainment targets – Year 3' documents in the *Busy Ant Maths Assessment Guide 3*, this guidance can also be used to support transition conversations between teachers of adjacent year groups, so that class teachers understand what pupils have been taught in the previous year group, how they have been taught it, and how effectively pupils have understood and remembered it.
