In Vitro Haploid Production in Higher Plants S. Mohan Jain, S.K. Sopory, Ricahrd Veilleux, 1996-06-30 The 18 chapters making up *In Vitro Haploid Production in Higher Plants* are divided into two sections Section 1 eight chapters covers historical and fundamental aspects of haploidy in crop improvement Section 2 deals with methods of haploid production including anther culture micropore culture ovary culture pollination with irradiated pollen in vitro pollination and special culture techniques including polyhaploid production in the Triticeae by sexual hybridization the influence of ethylene and gelling agents on anther culture conditional lethal markers and methods of chromosome doubling *In Vitro Haploid Production in Higher Plants* S. Mohan Jain, S. K. Sopory, R. E. Veilleux, 1997 Red Clover Science N.L. Taylor, K. H. Quesenberry, 1996-10-31 This book examines the literature on red clover since about 1985 In each of the 17 chapters an effort was made to summarize the earlier literature and to integrate the recent findings into this background The timing is appropriate with the present interest in sustainable agriculture in which red clover was so prominent in the past This is the first book to be published which deals solely with this important forage species Audience Primarily scientists and scientifically trained technicians who will appreciate an up to date summary on red clover Genetic Resources of Mediterranean Pasture and Forage Legumes Sarita Jane Bennett, P.S. Cocks, 2012-12-06 Genetic Resources of Mediterranean Pasture and Forage Legumes is a comprehensive review of grassland improvement in Mediterranean areas using legume species The book includes a detailed account of the processes involved in understanding the ecology of legumes and their collection in the Mediterranean through to their preliminary evaluation and storage at various Genetic Resource Centres A generic conspectus and key to the forage legumes of the Mediterranean basin is also included These proceedings are truly international with examples on the collection and use of Mediterranean genetic resources being illustrated by Genetic Resource Centres in Australia Cyprus France Greece Syria Turkey and Tunisia Current important issues such as the sustainability of Mediterranean grasslands the risk of genetic erosion and the principles of population genetics employed during a collecting mission are discussed The book will be of value to researchers working in the fields of grassland and rangeland improvement Mediterranean farming systems genetic resources and pasture and forage ecology *Advances in Plant Breeding Strategies: Breeding, Biotechnology and Molecular Tools* Jameel M. Al-Khayri, Shri Mohan Jain, Dennis V. Johnson, 2016-02-02 The basic concept of this book is to examine the use of innovative methods augmenting traditional plant breeding towards the development of new crop varieties under different environmental conditions to achieve sustainable food production This book consists of two volumes Volume 1 subtitled *Breeding Biotechnology and Molecular Tools* and Volume 2 subtitled *Agronomic Abiotic and Biotic Stress Traits* This is Volume 1 which consists of 21 chapters covering domestication and germplasm utilization conventional breeding techniques and the role of biotechnology In addition to

various biotechnological applications in plant breeding it includes functional genomics mutations and methods of detection and molecular markers In vitro techniques and their applications in plant breeding are discussed with an emphasis on embryo rescue somatic cell hybridization and somaclonal variation Other chapters cover haploid breeding transgenics cryogenics and bioinformatics

Stable Isotope Techniques in the Study of Biological Processes and Functioning of Ecosystems M.J. Unkovich, 2001-07-31 This book has a very strong practical orientation telling readers what methodologies are available using stable isotopes how studies should be designed and executed to maximise effectiveness and incisiveness in terms of data obtained and outcomes in terms of understanding events and processes in plant and ecosystem functioning The readership is very much aimed toward postgraduates with good knowledge of general biological principles and underlying chemical and physical processes Pre existing knowledge of or experience in application and assay of stable isotopes is not required The stable isotope research field is one of the most rapidly growing areas of ecophysiology and techniques using stable isotopes comprise an ever increasing component of research programs of university postgraduates and a wide range of agencies conducting environmental monitoring and rehabilitation programs The book is tailor made for such an audience

In Vitro Haploid Production in Higher Plants S. Mohan Jain, S.K. Sopory, R.E. Veilleux, 2013-03-09 Since the beginning of agricultural production there has been a continuous effort to grow more and better quality food to feed ever increasing populations Both improved cultural practices and improved crop plants have allowed us to divert more human resources to non agricultural activities while still increasing agricultural production Malthusian population predictions continue to alarm agricultural researchers especially plant breeders to seek new technologies that will continue to allow us to produce more and better food by fewer people on less land Both improvement of existing cultivars and development of new high yielding cultivars are common goals for breeders of all crops In vitro haploid production is among the new technologies that show great promise toward the goal of increasing crop yields by making similar germplasm available for many crops that was used to implement one of the greatest plant breeding success stories of this century i.e. the development of hybrid maize by crosses of inbred lines One of the main applications of anther culture has been to produce diploid homozygous pure lines in a single generation thus saving many generations of backcrossing to reach homozygosity by traditional means or in crops where self pollination is not possible Because doubled haploids are equivalent to inbred lines their value has been

appreciated by plant breeders for decades The search for natural haploids and methods to induce them has been ongoing since the beginning of the 20th century **Brinkman's catalogus van boeken en tijdschriften** ,2001 With 1901 1910 1956 1960 Repertorium is bound Brinkman's Titel catalogus van de gedurende 1901 1910 1956 1960 Title varies slightly
