**Space and Oceans** ATF Press, 2022-10-01 There is a growing concern over the ubiquitous distribution of plastic pollution that is evolving in the Beaufort Gyre in the Arctic Ocean prompting international collaboration and new environmental measures Marine pollution is recognised as an immediate threat to both land and marine ecosystems Satellites have proven useful in identifying ocean plastic patches and current movements in other oceans but little research has been applied to the Arctic a region that impacts eight countries making up the Arctic Circle This interdisciplinary team project investigates the use of Sentinel 2 Sentinel 6 Fourier Transform Spectroscopy stratospheric balloons and autonomous underwater vehicles to provide an integrated strategy including communication and outreach to tackling marine plastic pollution while recognizing that it is necessary to also prevent plastics from entering the ocean in the first place

**Nanoscale Zerovalent Iron Particles for Environmental Restoration** Tanapon Phenrat, Gregory V. Lowry, 2019-01-31 This is the first complete edited volume devoted to providing comprehensive and state of the art descriptions of science principles and pilot and field scaled engineering applications of nanoscale zerovalent iron particles NZVI for soil and groundwater remediation Although several books on environmental nanotechnology contain chapters of NZVI for environmental remediation Wiesner and Bottero 2007 Geiger and Carvalho Knighton 2009 Diallo et al 2009 Ram et al 2011 none of them include a comprehensive treatment of the fundamental and applied aspects of NZVI applications Most devote a chapter or two discussing a contemporary aspect of NZVI In addition environmental nanotechnology has a broad audience including environmental engineers and scientists geochemists material

scientists physicists chemists biologists ecologists and toxicologists None of the current books contain enough background material for such multidisciplinary readers making it difficult for a graduate student or even an experienced researcher or environmental remediation practitioner new to nanotechnology to catch up with the massive undigested literature This prohibits the reader from gaining a complete understanding of NZVI science and technology In this volume the sixteen chapters are based on more than two decades of laboratory research and development and field scaled demonstrations of NZVI implementation The authors of each chapter are leading researchers and or practitioners in NZVI technology This book aims to be an important resource for all levels of audiences i e graduate students experienced environmental and nanotechnology researchers and practitioners evaluating environmental remediation as it is designed to involve everything from basic to advanced concepts

*Principles of Industrial Engineering* Charles Buxton Going,2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1911 edition Excerpt It is evident that special knowledge and talent and skilled knowledge and discretion are necessary in standardizing the elements of stores in designing the arrangement of the stores rooms and in determining maximum and minimum limits but after that the routine becomes mechanical and the ordinary functions of operating the system are merely clerical In other words we have here the same idea that has already been alluded to in connection with mechanical manufacture the skill of the exceptional genius is permanently built into the machine or system and the routine of the repetitive movements of that machine or system can be supervised by the cheaper intelligence and the lower priced labor of the machine tender or clerk without fear of any deterioration in the quality of the product The actual movement of material that is shop transportation is of course an expense account and we met it when we were considering the distribution of expense the discussion of the physical means for accomplishing such work belongs to the study of manufacturing plant design and shop transportation rather than to this examination of the elements of management The transportation of material however is so intimately associated with storeskeeping that it should be noted here that very important influences on economy may be exerted by the arrangement and the appliances adopted In general economy is favored by orderly progress of material in one direction through the works the transportation lines of the various pieces or parts from the stores department through the manufacturing operations gradually drawing together in the order of assembly This ideal however becomes more and more difficult to realize practically as our finished product **Industrial**
