Social Media Analytics, Strategies and Governance Hamid Jahankhani, Stefan Kendzierskyj, Reza Montasari, Nishan Chelvachandran, 2022-08-18 Social media has spread rapidly on the global stage driving consumers attention and influence both consciously and subconsciously Whilst this type of platform may have been initially designed as a tool for open communication and expression it is also being utilized as a digital tool with widescale use cases The intelligence explosion information overload and disinformation play a significant part regarding individual group and country perceptions The complex nature of this data explosion created an increasing demand and use of artificial intelligence AI and machine learning ML to help provide big insights to big data AI and ML enable the analysis and dissemination of vast amounts of data however the ungoverned pace at which AI and autonomous systems have been deployed has created unforeseen problems Many algorithms and AI systems have been trained on limited or unverified datasets creating inbuilt and unseen biases Where these algorithmic tools have been deployed in high impact systems there are documented occurrences of disastrous decision

making and outcomes that have negatively impacted people and communities Little to no work had been conducted in its vulnerability and ability to exploit AI itself So AI and autonomous systems whilst being a force for societal good could have the potential to create and exacerbate societies greatest challenges This is a cohesive volume that addresses challenging problems and presents a range of innovative approaches and discussion
