Campante, Federico Sturzenegger, Andrés Velasco, 2021-10-11 Macroeconomic policy is one of the most important policy domains and the tools of macroeconomics are among the most valuable for policy makers Yet there has been up to now a wide gulf between the level at which macroeconomics is taught at the undergraduate level and the level at which it is practiced At the same time doctoral level textbooks are usually not targeted at a policy audience making advanced macroeconomics less accessible to current and aspiring practitioners This book born out of the Masters course the authors taught for many years at the Harvard Kennedy School fills this gap It introduces the tools of dynamic optimization in the context of economic growth and then applies them to a wide range of policy questions ranging from pensions consumption investment and finance to the most recent developments in fiscal and monetary policy It does so with the requisite rigor but also with a light touch and an unyielding focus on their application to policy making as befits the authors own practical experience **Advanced Macroeconomics An Easy Guide** is bound to become a great resource for graduate and advanced

Scarfe, 1977 **Modern Business Cycle Theory** Robert J. Barro, 1989-01 The new classical approach to macroeconomics which assumes that people gather and use economic information efficiently has been the most important theoretical advance since the Keynesian revolution of the 1930s This book surveys the major contributions of the second generation of proponents of the new classical approach emphasizing real business cycle theories and applying them to a variety of phenomena The chapters include expositions of growth theory real models of business fluctuations the informational role of prices consumption fiscal policy rules versus discretion in monetary policy time consistency and policy and monetary models Although the chapters are aimed at advanced undergraduate and graduate level students they will also be of interest to researchers who are looking for a compact and original exposition of the new classical macroeconomics *Advanced Macroeconomics* David Romer, 2011-11-01 David Romer's *Advanced Macroeconomics* 4e continues its tradition as the standard text and the starting point for graduate macroeconomic courses and helps lay the groundwork for students to begin doing research in macroeconomics and monetary economics Formal models are used to present and analyse key ideas and issues The theoretical analysis is supplemented by examples of relevant empirical work illustrating the ways that theories can be applied and tested This well respected and well known text is unique in the marketplace *Advanced Modern Macroeconomics* Max Gillman, 2010 No further information has been provided for this title *Modern Macroeconomics* by Max Gillman takes a new and modern approach to macroeconomic theory using microeconomic foundations Building from the standard neo classical models Gillman has developed a new dynamic model which works to explain business cycles and unemployment why you can have a banking lead recession as well as fiscal and monetary policy Although strong in mathematical rigour all calculations in this text are fully derived and graphs provide a direct representation making it accessible This text is suitable for undergraduate students studying *Advanced Macroeconomics* courses Studies In Medium-run Macroeconomics: Growth, Fluctuations, Unemployment, Inequality And

Miles, Andrew Scott, 2005 Written with a strong business focus Miles and Scott's *Macroeconomics and the Global Business Environment* Second Edition examines fascinating real world economic issues shows why these issues matter and uses them as an entry point into advanced economic theory Throughout the authors present technical material clearly and accessibly allowing students to develop a solid understanding of the global economy and how economists think about it

The Impact of Science on Economic Growth and its Cycles Arvid Aulin, 1998-09-17 The author shows that the enormous gap between theory and facts in modern macroeconomics can only be eliminated by nonlinear macroeconomic dynamics with the following special characteristics First of all only certain group theoretical invariants generate the correct growth cycles with irregularly varying lengths not any stochastic process as usually applied for this purpose Furthermore a special extended value function and generalized human capital are needed for a correct representation of scientific and technological innovation Finally the correct nonlinear macroeconomic dynamics are not reducible to microeconomics for both of the above mentioned reasons

Models of Business Cycles Robert E. Lucas, 1987-01-01 In the past decade macroeconomic theory has undergone a remarkable transformation At the forefront has been the rational expectations revolution and this school's most brilliant exponent is Robert E Lucas In this elegant and relatively non technical survey Lucas reviews the nature and consequences of recent developments in monetary and business cycle theory He discusses the usefulness of alternative models in determining the effects of economic policy on consumption streams and individual welfare Drawing on a specific model of aggregate activity which represents the current frontier in business cycle research he then examines the contemporary theory of unemployment Finally and most controversially he explores the role of monetary disturbances

Emergent Macroeconomics Domenico Gatti, Edoardo Gaffeo, Mauro Gallegati, Gianfranco Giulioni, Antonio Palestrini, 2008-12-05 This valuable book contributes substantively to the current state of the art of macroeconomics It provides a method for building models in which business cycles and economic growth emerge from the interactions of a large number of heterogeneous agents Drawing from recent advances in agent based computational modeling the authors show how insights from dispersed fields can be fruitfully combined to improve our understanding of macroeconomic dynamics

Advanced Macroeconomics Diana Loubaki, 2021-01-25 The main purpose of the book consists to explain first the basic concepts such as scarcity choice opportunity cost and their relationship with the

others variables in the economic since those concepts are the heart of the economics Second to present the macroeconomics field including money and international finance based on exchange trade which is a wealth creation source for the country s economy thus deserves a financial system organization
