Keith D. Swenson, 2011-01-01 *Business Process Management and Workflow* are by their very nature social activities. The collaboration and communication patterns that are now increasingly referred to as social computing were also fundamental to the BPM and workflow models of the early 1990s. Yet it has been the recent explosion of social computing and accompanying success of social production from Linux to Wikipedia and Facebook to Twitter which have had the most dramatic impact on collaboration in business environments. Today we see the transformation of both the look and feel of BPM technologies along the lines of social media as well as the increasing adoption of social tools and techniques democratizing process development and design. It is along these two trend lines the evolution of system interfaces and the increased engagement of stakeholders in process improvement that Social BPM has taken shape. Table of Contents: The Quantum Organization, How Social Technology will Displace the Newtonian view, The Role of Trust and Reputation in Social BPM, Change Management Processes, How to Link BPM Governance and Social Collaboration through an Adaptive Paradigm, Leveraging Social BPM for Enterprise Transformation, BPM Social Technology Collaboration and the Workplace of the Future, A Model Driven Approach to Social BPM Applications, How Social Technologies Enhance the BPM Experience for all Participants, Voice of the Network Through Social BPM, Evidence Based Service, Listening to Customers to Improve Customer
