### Why Visibility is the New Literacy

In the industrial era literacy meant reading and writing In the digital era it meant coding and publishing In the AI era literacy means being visible correctly Visibility now defines credibility If AI cannot find you cite you or contextualize your work your expertise may as well not exist But visibility without consciousness risks distortion That's why Visible to AI combines strategy with philosophy it teaches you not just how to be seen but how to be seen responsibly Because the next frontier of literacy isn't about what we read it's about what the machines read from us
