CC AI, 2002. The Modern Teacher Archibald Watson Bain, 1921. **Art Education**, 1894. *Phase II Final Report on an Intelligent Tutoring System for Teaching Battlefield Command Reasoning Skills* Eric A. Domeshek, 2004. This report documents Phase II efforts to develop a Socratic Intelligent Tutoring System (ITS) for Teaching Battlefield Command Reasoning Skills. The ultimate goal of this research program is to develop new ITS techniques and technology for teaching skills that cannot be taught as simple methods and procedures to be followed. Achieving expert levels of proficiency in professional-level reasoning skills, whether for battlefield commanders or for professionals in a wide range of other fields, requires extensive practice, coaching, and feedback. Students must be given a chance to drill on detailed and situation-specific knowledge as well as high-level thinking habits and skills applicable across diverse situations. We studied exemplary coaching by observing tutoring sessions centered on Tactical Decision Games. We analyzed those sessions to identify behaviors that could be enacted and controlled by an automated Socratic tutor. We explored techniques and ultimately built an operational prototype exhibiting many of the key behaviors identified. We also built extensive tools to support authoring of the prototype's knowledge and behavior. This work has produced extensive data analysis and implementation, advancing our understanding of and ability to model professional-level Socratic tutoring.
