A Brief History of Creative Work and Plutonomy Mathew Varghese, 2020-11-10 This book discusses the influence of creative work on human life and the role it has played in shaping human civilization since antiquity To do so it analyzes the history of thought on creative work from three civilizations Greek Indian and Chinese as well as contemporary neurological studies on consciousness According to the classical Greeks humans are instinctively predisposed to use creative work to gain truth wisdom and happiness the Indians consider that Dharma duty morality etc can be achieved only through work karma and for the Chinese creative work is needed to attain the supreme wisdom Dao Modern studies on consciousness show that our brain creates a personal self model ego tunnel when we learn things creatively and developing such skills provides lifelong protection for the brain In the 21st century human involvement in creative work is declining as we use mechanized systems to gain more and more profit but the wealth falls into the hands of the few super-rich the Plutonomy As creative work is taken over by AI systems human work is reduced to operating those machines and this in turn leads to an exponential growth in the number of part time workers Precariat The declining value of human life today is a consequence of this change in society Further reducing creative work means we have no way to distribute wealth nor do we

have any means to address problems like the lack of enthusiasm in the young the health crisis due to lack of physical activity or the environmental crisis due to the high demand for energy to run mechanized systems This book explores these issues
