Human-Earth System Dynamics Rongxing Guo, 2018-05-16 This book explores the factors and mechanisms that may have influenced the dynamic behaviors of earliest civilizations focusing on both environmental geographic factors on which traditional historic analyses are based and human behavioral factors on which anthropological analyses are usually based It also resurrects a number of common ancestral terms to help readers understand the complicated process of human and cultural evolution around the globe Specifically in almost all indigenous languages the words wa and any variants of it were originally associated with the sound of crying of and certainly were selected as the common ancestral word with the meanings of house home homeland motherland and so on by early humans living in different parts of the world This book provides many neglected but still crucial environmental and biological clues about the rise and fall of civilizations ones that have largely resulted from mankind's long lasting Win Stay Lose Shift games throughout the world The narratives and findings presented at this book are unexpected but reasonable and are what every student of anthropology or history needs to know and doesn't get in the usual text Professor Guo explores the dynamics of civilizations from the beginnings to our perplexingly complex world There are lots of thought provoking ideas here on the rise and decline of civilizations and nations Anyone wishing to understand global developments should give this book serious consideration John Komlos University of Munich Germany and Duke University USA It is interesting to see a Chinese perspective on the questions of deep history that have engaged Jared Diamond Yuval Harari and David Christian Guo argues that understanding cyclical threats has been the key to human progress which is driven by the dialectic of material privation and human ingenuity Peter Rutland Wesleyan University USA

[Urban Watersheds](#) Daniel Rogers, 2020-05-06 Understanding that the natural world beneath our feet is the point at which civilization meets the natural world is critical to the success of restoration and prevention efforts to reduce contaminant impacts and improve the global environment because of one simple fact contaminants do not respect country borders Contaminants often begin their destructive journey immediately after being released and can affect the entire planet if the release is in just the right amount at just the right location and at just the right time Taking an interdisciplinary approach *Urban Watersheds Geology Contamination Environmental Regulations and Sustainability Second Edition* presents more than 30 years of research and professional

practice on urban watersheds from the fields of environmental geology geochemistry risk analysis hydrology and urban planning The geological characteristics of urbanized watersheds along with the physical and chemical properties of their common contaminants are integrated to assess risk factors for soil groundwater and air This new edition continues to examine the urban environment and the geology beneath urban areas evaluates the contamination that affects watersheds in urban regions and addresses redevelopment strategies Features of the Second Edition Examines contaminants and the successes of environmental regulation worldwide and highlights the areas that need improvement Describes several advances in investigation techniques in urban regions that now provide a huge leap forward in data collection resolution and accuracy Explains the importance of understanding the geological and hydrogeologic environments of urban and developed regions Provides new and enhanced methods presented as a sustainability model for assessing risks to human health and the environment from negative human induced contaminant impacts Includes a new chapter that surveys how environmental regulations have been successful or have failed at protecting the air water and land in urban areas Suitable for use as a textbook and as a professional practice reference the book includes case studies on successful and unsuccessful approaches to contaminant remediation as well as practical methods for environmental risk assessment PowerPoint presentations of selected portions of the book are available with qualifying course adoption Daniel T Rogers is currently the Director of Environmental Affairs at Amsted Industries Inc in Chicago Illinois His writings address environmental geology hydrogeology geologic vulnerability and mapping contaminant fate and transport urban geology environmental site investigations contaminant risk brownfield redevelopment and sustainability He has taught geology and environmental chemistry at Eastern Michigan University and the University of Michigan [Earth System History](#) Steven M. Stanley, 2004-10-29 Designed for a new generation of readers Stanley's Earth System History is a reforging of his Exploring Earth and Life Through Time Adopting an earth system approach throughout Earth System History shows students how Earth's ecosystem has developed over time and how events in the past provide a perspective for dealing with present and future changes Clear and concise the new Second Edition of this introduction to historical geology is perfect for one term non majors courses and contains lots of new content and improved visuals **Living with the Earth, Third Edition** Gary S. Moore, 2007-04-05 With an emphasis on biological chemical and physical sources of pollution this text incorporates traditional concepts of environmental health with new controversies regarding environmental threats to human health such as the link between air pollutants and asthma as well as the role of pollution in cancer risk [Climate Change and Mental Health Equity](#) Rhonda J. Moore, 2024-07-18 Climate change is a driver of poverty poor mental health inequity and increased intersectional vulnerability with significant differential global impacts on individual and community health and well being For example people living in low resource settings in high income countries HICs and in low and middle income countries LMICs are at greater risk often experiencing fragile socioeconomic political and health infrastructures and conflict affected settings FCAS

that place them at greater risk and vulnerabilities to climate change related mental health impacts The broad goal of this book is to place a social justice and inclusive lens on climate change and mental health equity focusing on these three key elements people place and community The book includes perspectives from the global North the global South and Indigenous perspectives to help provide greater insight into how we can better understand climate change and mental health equity across peoples place and community This book s three pronged approach will focus on certain trends in this emerging and growing field also bridging some of the more extensive gaps and is a tool for better understanding how mental health disparities might be addressed at this time Quantitative Evaluation of the Whole Petroleum System Xiongqi

Pang,2023-09-23 This book introduces a complete quantitative evaluation system of the Whole Petroleum System WPS on theory and expounds the correlation and difference between conventional and unconventional oil and gas reservoirs and resources with large number of well prepared charts and novel expressions It has important guiding significance for the exploration and development of conventional and unconventional oil and gas all over the world and provides valuable insights for reader with an interest in petroleum geology **Sunburnt Country** Joëlle Gergis,2018-04-02 What was Australia s

climate like before official weather records began How do scientists use tree rings ice cores and tropical corals to retrace the past What do Indigenous seasonal calendars reveal And what do settler diary entries about rainfall droughts bushfires and snowfalls tell us about natural climate cycles Sunburnt Country pieces together Australia s climate history for the first time It uncovers a continent long vulnerable to climate extremes and variability It gives an unparalleled perspective on how human activities have altered patterns that have been with us for millions of years and what climate change looks like in our own backyard Sunburnt Country highlights the impact of a warming planet on Australian lifestyles and ecosystems and the power we all have to shape future life on Earth *Psycho-social Explorations of Trauma, Exclusion and Violence* Christopher

Scanlon,John Adlam,2022-01-06 The central theme of this book is the operation of intersecting discourses of power privilege and positioning as they are revealed in fraught encounters between in groups and out groups in our deeply fractured world The authors offer a unique perspective on inter group dynamics and structural violence at local societal cultural and global levels dissecting processes of toxic othering and psychosocial re traumatisation The book offers the Diogenes Paradigm as a unique conceptual tool with which to analyse the ways in which those of us who come to be located outside or on the margins of dominant social structures are in one way or another the inheritors of the legacies of centuries of oppression and exclusion This analysis offers a distinctive psycho social redefinition of trauma that foregrounds the relationship between the inhospitable environments we generate and the experiences of un housedness that we thereby perpetuate Written in an engaging and accessible style Psycho social Explorations of Trauma Exclusion and Violence directly addresses pressing global issues of racial trauma human mobility and climate disaster and offers a manifesto for the creative re imagining of the places and spaces in which conversations about restructuring and reparation can become sustainable This is an essential and

compelling book for anyone committed to social justice especially for all practitioners working in health social care and community justice settings and researchers and academics across the behavioural and social sciences *Radar Handbook, Third Edition* Merrill I.
