

Suggested answers to exam-style questions for Section 1

Multiple choice questions

- 1 D
Wants are unlimited whereas resources are not. What we want is greater than what we are capable of producing. Over time, the quantity and quality of resources increases in most of the countries. This enables them to produce more. The growth in productive capacity, however, is exceeded by people's desire for goods and services.
- 2 D
Both increase. A richer economy is likely to have more capital in particular. As the income of an economy increases, its citizens also tend to desire even more goods and services.
- 3 D
Capital is goods used to produce other goods and services. C is an example of labour, B is saving and A is financial capital.
- 4 D
In economics, the word 'land' covers all natural resources including sea water, forests and land itself.
- 5 B
By rejecting the offer from her neighbour, the consumer is giving up the opportunity to have \$200.
- 6 C
From the man's point of view, the best alternative to being a builder is working as a gardener.
- 7 B
A PPC shows the maximum output of two products or combinations of those two products that can be produced with existing resources, including capital and labour. It does not show the quantity of resources in an economy, the popularity or price of products.
- 8 A
The change in the PPC shows that the maximum amount of clothing that can be produced has increased while the maximum output of food that can be produced is unchanged. This must mean that something has changed that affects only the output of clothing. Advances in technology that are just affecting the clothing industry are one possible cause. B would increase both the maximum output of clothing and food that could be produced as labour can be used to produce both clothing and food, moving the PPC to the right on both the vertical and horizontal axes. C may influence the position of the production point and D would alter the position of the production point.
- 9 B
The opportunity cost of increasing the output of capital goods from 20 to 30 is initially 30 consumer goods (100 — 70). The shift to the right of the PPC causes this to fall to 10 (150 — 140). This means 20 fewer consumer goods have to be given up.
- 10 D
When there are unemployed resources, there is no opportunity cost involved in producing more goods and services. Moving from point X to point Y results in more luxury and more basic goods. No goods have to be sacrificed to move on to the PPC.
