Reforming Economics and Economics Teaching in the Transition

Economies Michael Watts, William B. Walstad, 2002-01-01 The volume is of greatest interest to those pursuing issues of the implementation of economics education and its impact at an elementary level on economic understanding and attitudes Through generally careful statistical analysis it shows what can be done even in a most difficult environment as well as the

constraints on change imposed by Soviet legacies It is a valuable addition to the literature on economics pedagogy Richard E Ericson Slavic Review This comprehensive and impressive volume presents the first book length multi country investigation of reform of economic education in transition economies Authors from the West and from transition economies describe the major changes in economics content and instruction that occurred in schools and universities throughout nations in Eastern and Central Europe and the former Soviet Union from 1989 to 2000 Macroeconomics Campbell R. McConnell, Stanley L. Brue, 1999 McConnell and Brue's Macroeconomics Principles Problems and Policies is the leading Principles of Macroeconomics textbook because it is innovative and teaches students in a clear unbiased way The 17th Edition builds upon the tradition of leadership by sticking to 3 main goals help the beginning student master the principles essential for understanding the economizing problem specific economic issues and the policy alternatives help the student understand and apply the economic perspective and reason accurately and objectively about economic matters and promote a lasting student interest in economics and the economy **Regulating Mergers and Acquisitions of U.S. Electric Utilities: Industry Concentration and Corporate Complication** Scott Hempling, 2020-10-30 What happens when electric utility monopolies pursue their acquisition interests undisciplined by competition and insufficiently disciplined by the regulators responsible for replicating competition Since the mid 1980s mergers and acquisitions of U S electric utilities have halved the number of local independent utilities Mostly debt financed these transactions have converted retiree suitable investments into subsidiaries of geographically scattered conglomerates Written by one of the U S's leading regulatory thinkers this book combines legal accounting economic and financial analysis of the 30 year march of U S electricity mergers with insights from the dynamic field of behavioral economics **The Meaning of Growth** Richard McNeill Douglas, 2025-09-30 Since the Limits to Growth report was published in 1972 it has been widely known that a commitment to endless growth was putting us on course for environmental disaster so why have we failed to take decisive political action in the half century since then In The Meaning of Growth Richard McNeill Douglas uses interpretive social science to uncover the cultural roots of political resistance to environmental science and policy Through a close reading of anti environmentalist rhetoric the book identifies its idolisation of growth as a defence of a modern Western European world view focusing on values of freedom power and immortality The significance of these findings is drawn out by applying the secularisation thesis a theoretical account of the development of a modern understanding of reality from a theological world view to which it is ostensibly opposed This framework is used to offer a deep interpretation of what is at stake in environmental debate that to accept there are limits to growth means abandoning crucial elements of a faith in a theodicy of progress that makes life meaningful in a secular age Douglas concludes by suggesting that the precondition for political action on the environment is a change of philosophical perspective that provides for a sense of meaning in a world of limits This book should be of interest to academics in the fields of environmental sociology and communications studies as well as activists interested in understanding the motivations of anti

environmentalist campaigners and how to counter their influence Macroeconomics Campbell R. McConnell, Stanley L. Brue, Sean Masaki Flynn, Randy R.
